Association  
of Oil & Gas  
Producers

# Methane Emissions Industry Meeting

Geneva, 21 March 2018

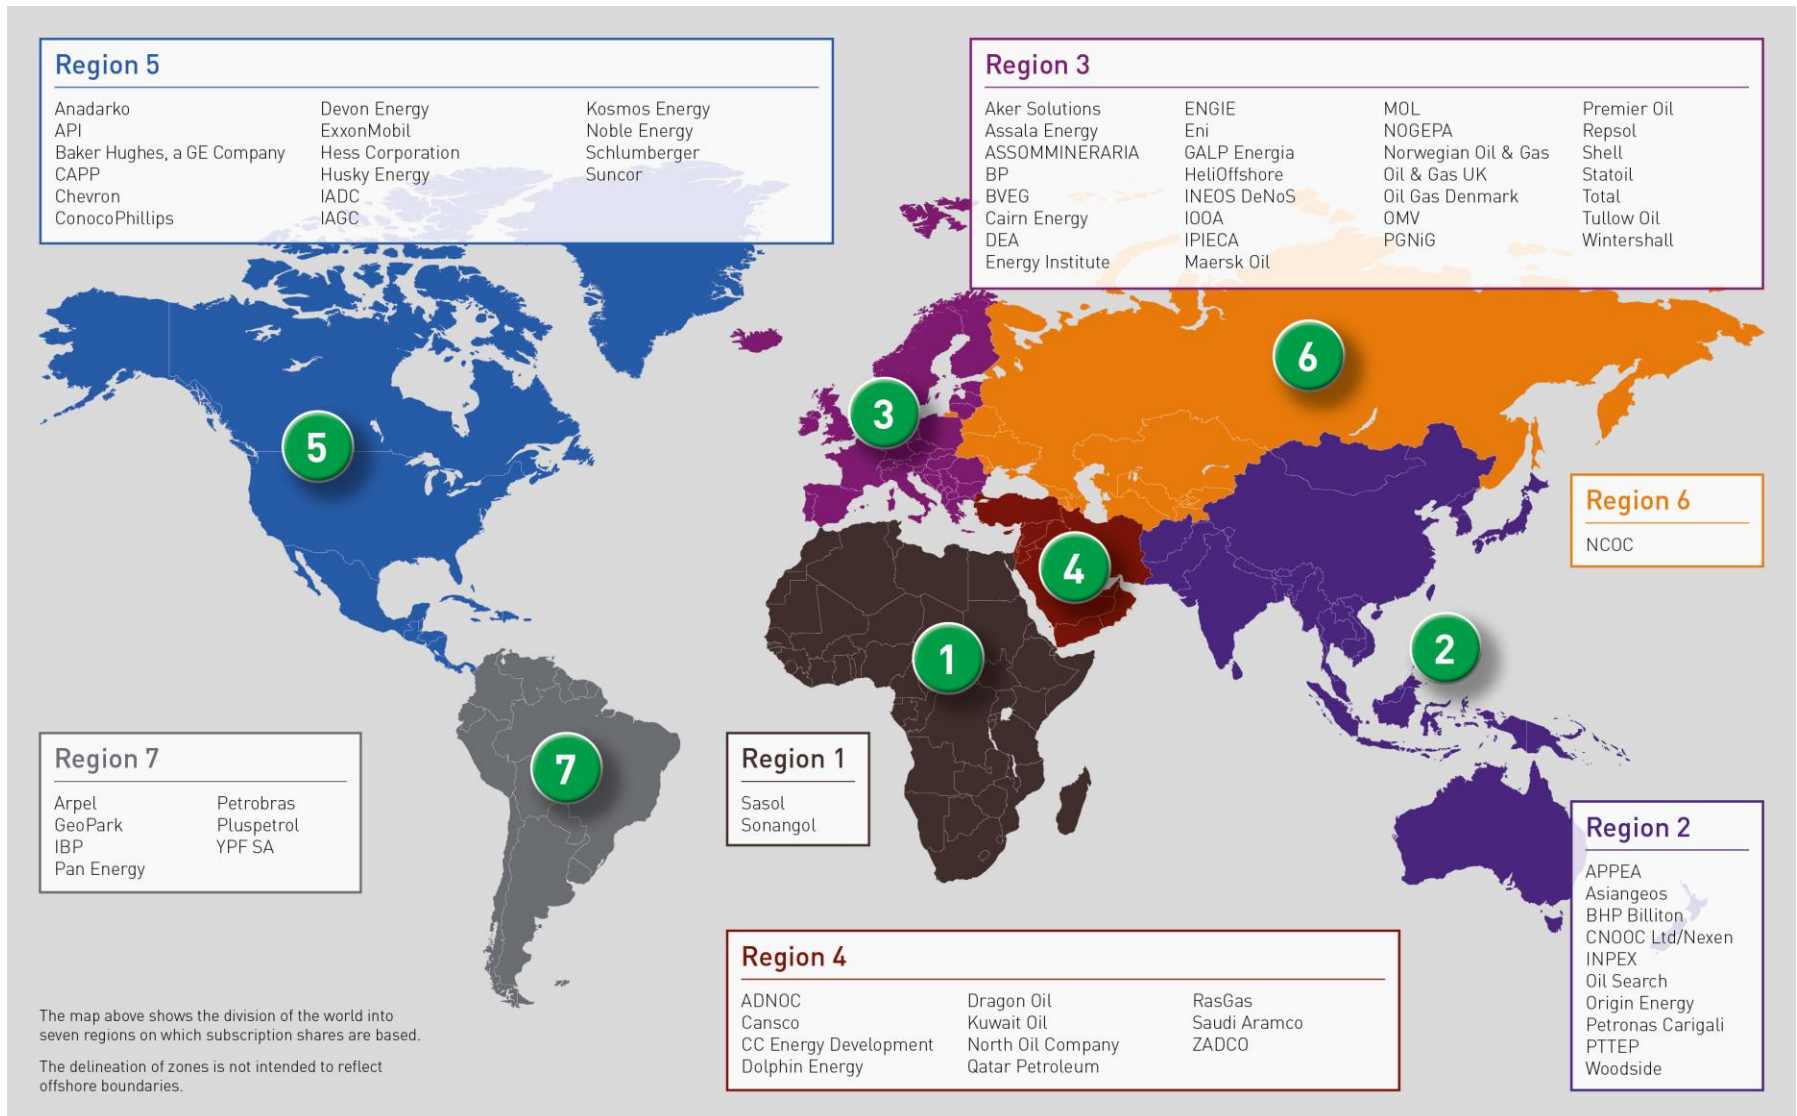

# Agenda

## 1. Who we are?

## 2. IOGP & GasNaturally activities:

1. IOGP Environmental performance indicators
2. Other activities: Guiding Principles to reduce methane emissions, HC BAT Guidance Document
3. GasNaturally activities

# Over 80 Members around the world

Map shows locations of Member Head Offices. Many operate globally

# IOGP report 2016e : CH<sub>4</sub> Emissions

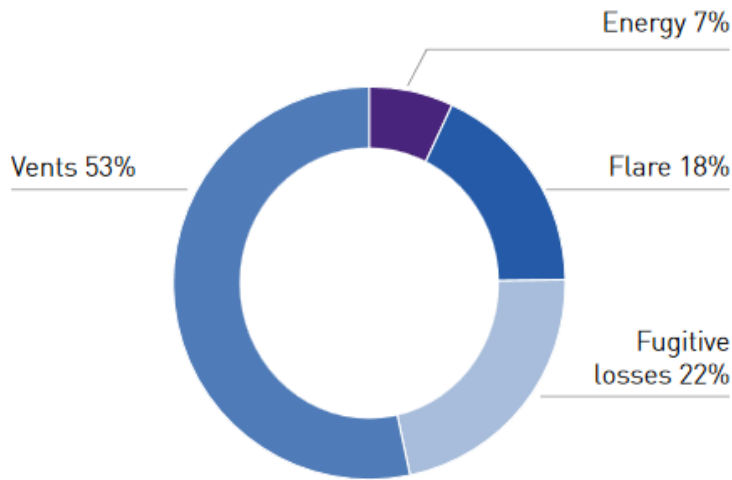

Figure 11: CH<sub>4</sub> emissions by source – 2016

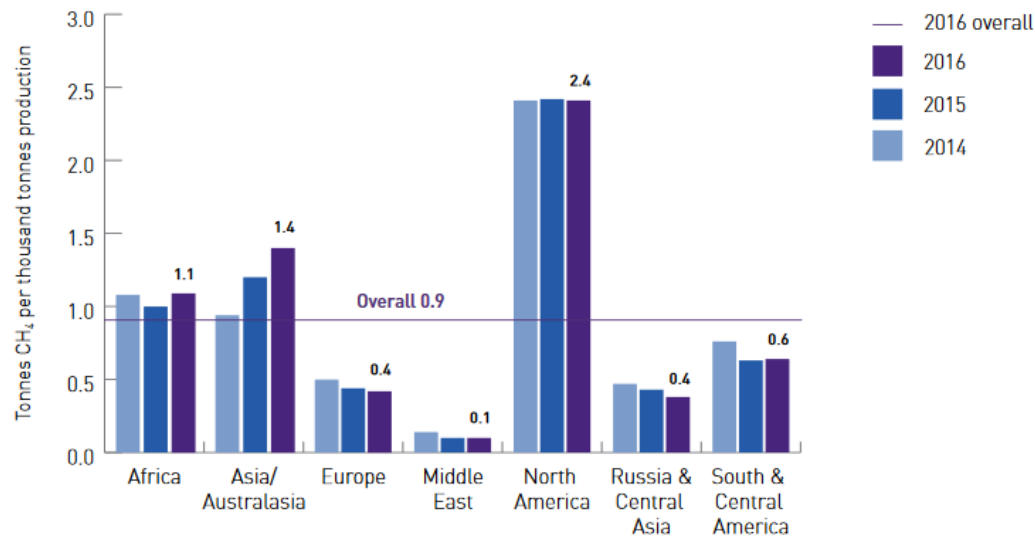

Figure 10: CH<sub>4</sub> emissions per unit of hydrocarbon production (by region)

- Report published since 1999
- Latest edition here: Nov. 2017
- Next report: Sept. 2018

# Other activities related to CH4 emissions

## Hydrocarbons BAT Guidance Document

- It will establish a list of Best Available Techniques & Emissions Performance Levels for offshore/onshore installations.
- It will include information on techniques for monitoring methane emissions.

## Next steps

- **End March 2018:** 1<sup>st</sup> draft document to be ready
- **Sept. 2018:** 2<sup>nd</sup> draft document to be ready
- **Nov. 2018:** final document

## Methane Guiding Principles

- IOGP agreed to be 'associate signatory' of the Methane Guiding Principles.
- We are assessing how we can contribute to their implementation:
  - Strive to improve the IOGP Environmental Performance Indicators
  - Promote the oil&gas industry efforts to reduce methane emissions
  - Advocate for sound policy on methane emissions

# GasNaturally activities after Madrid

- **August 2017:** GN submitted **comments** to WEO2017 – Chapter on gas & CH4 emissions
- **Nov. 2017:** **Factsheet** on methane emissions
- **Nov. 2017:** **Event** with IEA and Commission – launch of WEO 2017 in Brussels
- **Dec. 2017:** **Video** on methane emissions

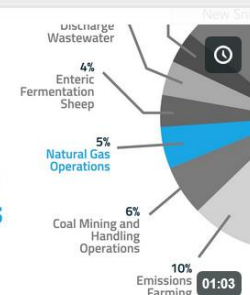

## Factsheet:

[http://www.gasnaturally.eu/uploads/Modules/Publications/gasnaturally\\_factsheet\\_methane\\_emissions.pdf](http://www.gasnaturally.eu/uploads/Modules/Publications/gasnaturally_factsheet_methane_emissions.pdf)

In Europe,  
5% of methane  
emissions come  
from natural gas
