

**Breakout group discussions on application of UNFC-2009  
for reporting U and conducting case study:**

***Group 4 : Comprehensive Extraction projects***

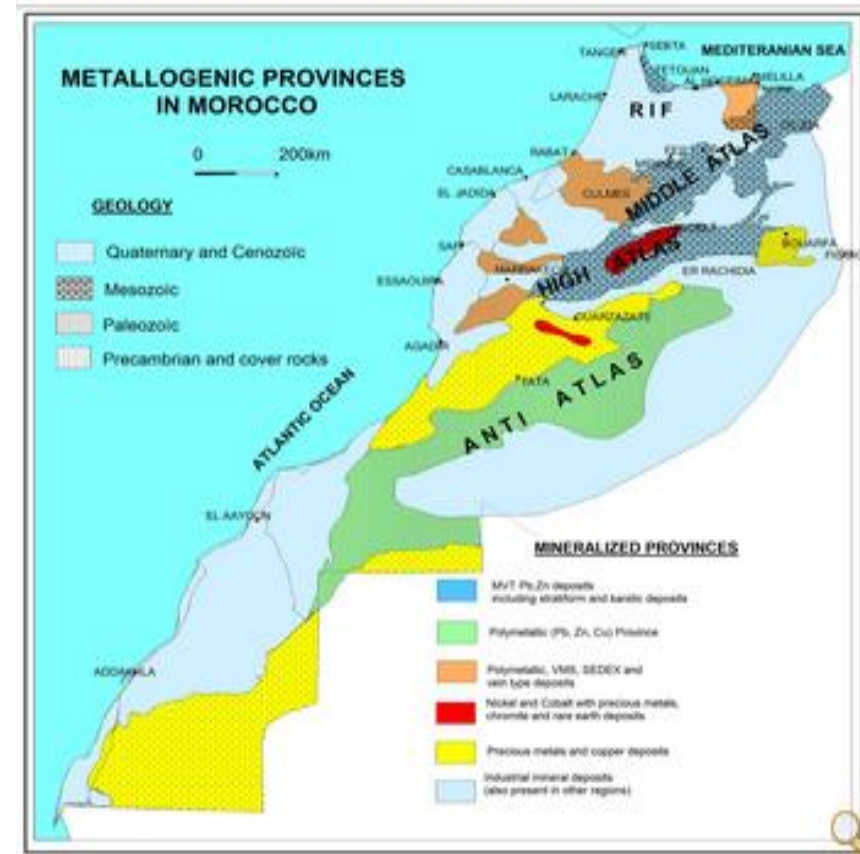

- N. ABBES (Tunisia)**
- E.H. SAYOUTY (Morocco)**

N.B: UNFC-2009 → Fossil Energy and Mineral Reserves Resources

# Case Study: Morocco

3 prospects figures:

- UxP
- U-Th-REE
- U Occurrences

**Objective: To be able to report using**

**UNFC-2009 for U resources :**

**Why?, Who?, How?, When?**

**Why?:**

- Homogeneous classification
- Same Language
- Viable Data : Reliable resource identification
- Footbridges with other classification
- Tool of decision-making
- U remaining to recover; comprehensive extraction (Technology evolution)

$$(E_i, F_j, G_k) \rightarrow (E_{i-1}, \text{ or } F_{j-1}, \text{ or } G_{k-1})$$

# Who?:

- National Level:
  - Decision Makers
  - Project Responsible/ Stakeholders
  - National partners
- International level
  - Partners (IAEA, UN/ECE.....)
  - International investors

# How?:

- Decision Makers:

- Information and Communication (paper position)

- People involved: project managers

- Capacity Building
- Workshop/ training

Beneficiaries target:

- competent person: (Feasibility, Geology, and Finance), Ex: ESIA (Env. & Social Impact Asses..)
- Project managers

- Scenario 2:

- Sub-region: Morocco, Tunisia, Algeria, Mauritania, Sudan
- IAEA/UN-ECE sponsoring: Expertises

# When?:

**Depend on:**

- **the feedback of the authorities,**
- **the results of the concertations with concerned people (Gouvernement Agences, companies.. )**

*Thank you for your attention*
