

# Draft outline of the nexus assessment

- Overview of the sub-region (economic emphasis)
- A comparative overview of the countries – selection of World Development Indicators
  1. Population distribution and growth
  2. Economy and employment by sector
  3. Agricultural sector
  4. Land use and Forestry
  5. Resources use by sector (use of water, energy)
  6. Water resources and use
  7. Energy resources, production and use
  8. Environment and ecosystem
  9. Climate and emissions
- National Policies, Targets and Actions (by country)
  - General economic overview. The governments' policies to economically grow: which are the most important sectors for the economy of each country and how are they going to evolve in the future

# Draft outline of the nexus assessment (cont.)

- The Basin.
- Relevance of the basin for national development plans:
  - How much do each country rely on the basin's natural resources?
  - How is each country investing in the regions corresponding to the basin?
- Agreements (bilateral, multilateral)
- The resource Nexus in the basin.
  - Main nexus issues: multiple/competing uses of a common resource or influence of one resource's use on another's availability or quality
- Results of the Nexus analysis
  - identified issues – diagnostic and solutions
  - Examples of existing integrated solutions
