

Working Group on Water and Health – sixth Meeting
Geneva, Switzerland, 3 and 4 July 2013

Atlas on Water and Health [AoWaH] - Progress Report 2013 -

Christoph Höser & Thomas Kistemann
Institute for Hygiene and Public Health, University Bonn

WHO Collaborating Centre for Health
Promoting Water Management & Risk Communication

AoWaH – The Basic Concept

More than a collection of maps:

- Comprehensive reference
- One-stop-shop for an audience interested in Water, Sanitation and Health

Intended benefits

- Update available data
- Combine different sources which cover water, sanitation and health
- Integrate the temporal dimension
- Provide analysis tools
- Serve countries and focal points, support and facilitate reporting

What is **not** intended:

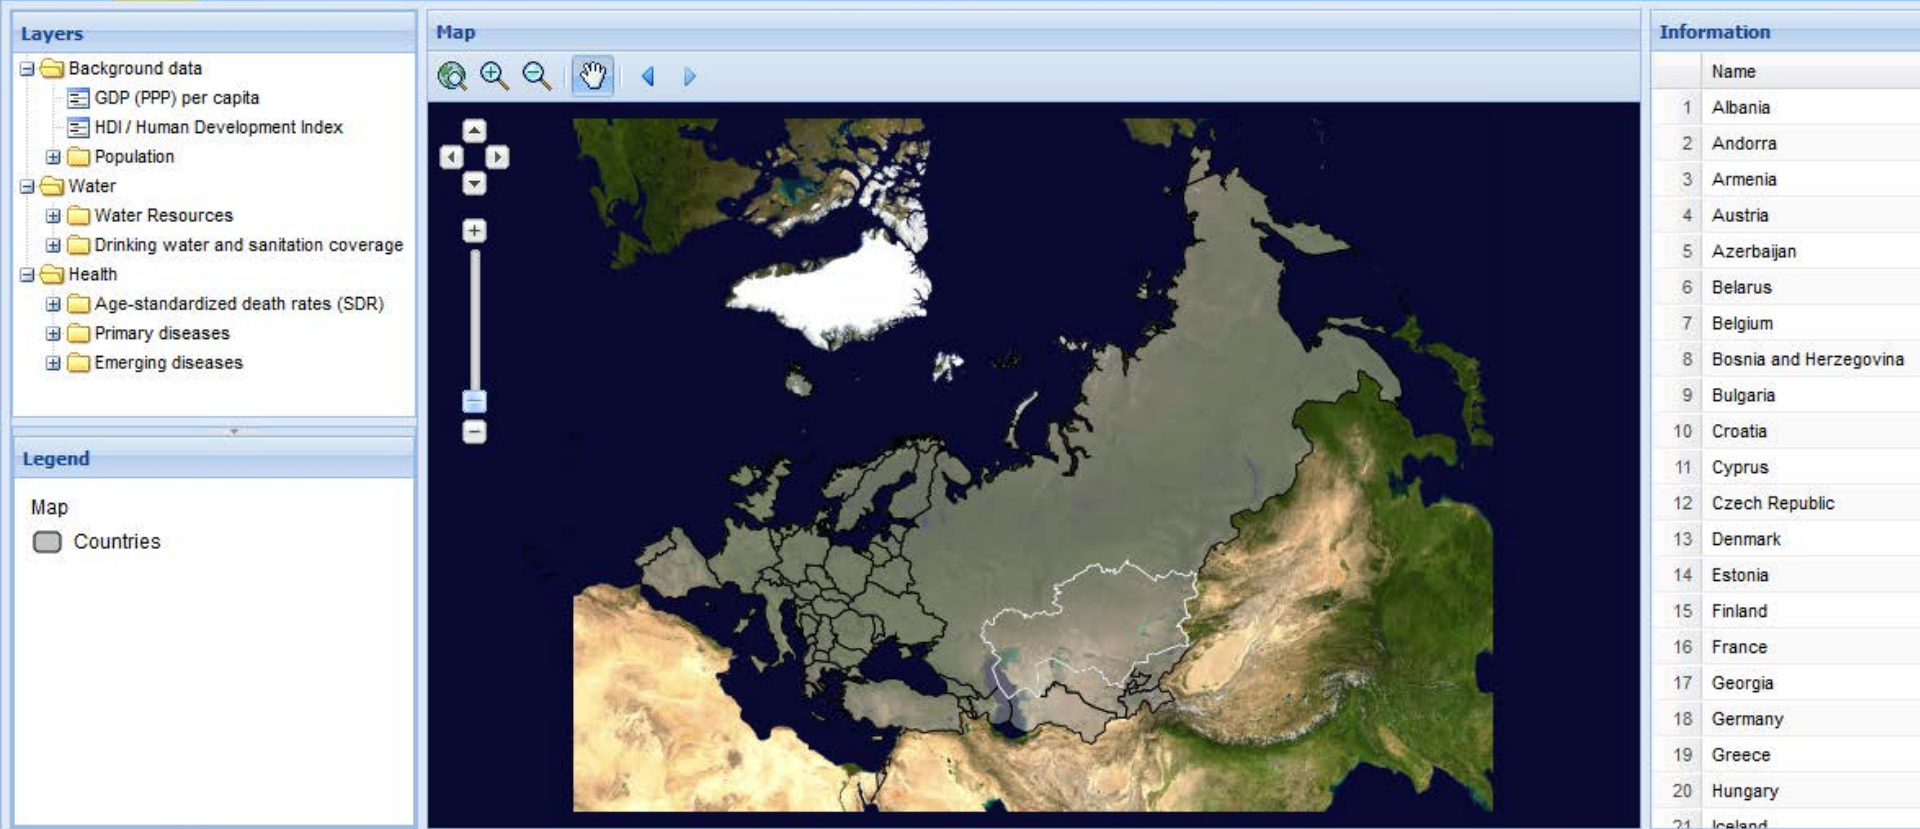

- New surveys
- New questionnaires
- Additional monitoring

but:

- Use available data
- Rely on JMP, CISID, GLAAS, ENHIS, ...

From where did we start?

- Version 1 of the Atlas (Parma 2009)
- Dr. Ina Wienand, Tobias Frechen, Christoph Höser, Thomas Kistemann
- <http://www.waterandhealth.eu/>

Time

- Visualize **progress** and **development** by making the time dimension easily available

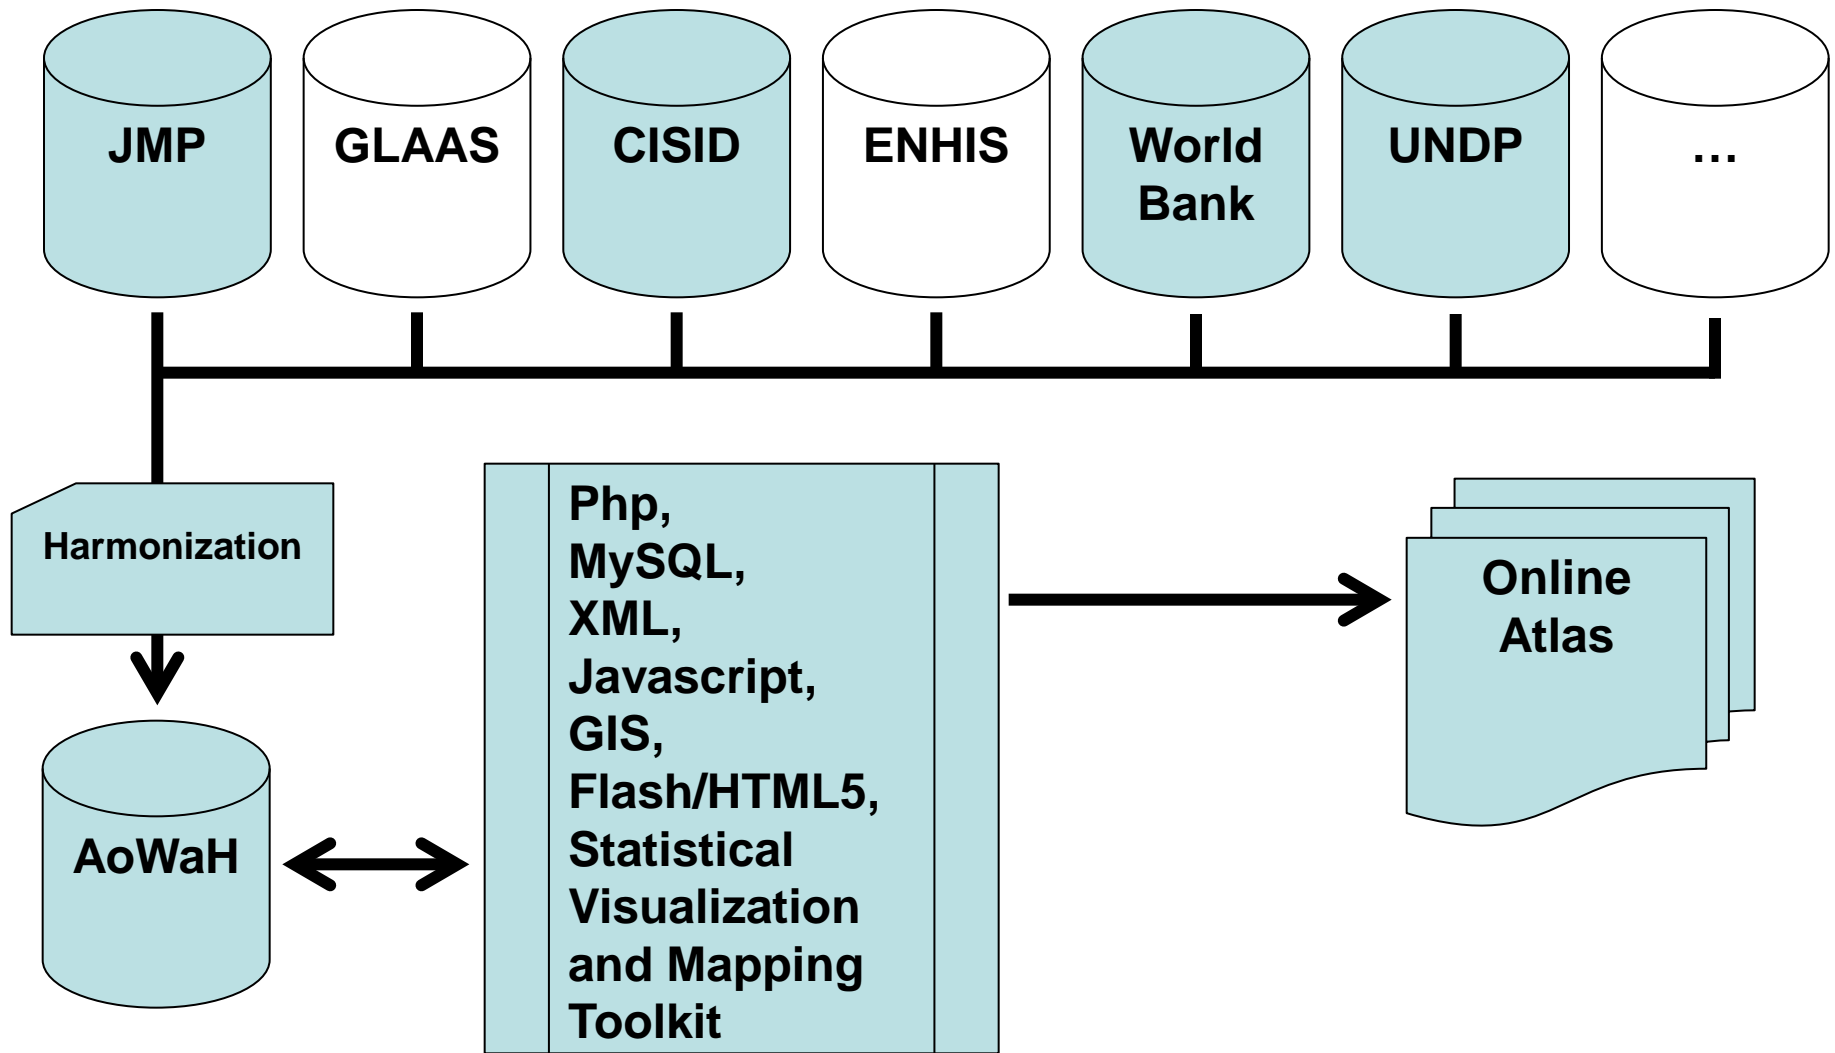

Combination

- Visualize indicators about health **AND** water **AND** sanitation issues

Version 2: What already happened

- Launched in 2012
- Technical meetings in Summer 2012, Concept definition
- Regional meeting in October 2012, Bonn Decision about conceptual framework
- Regional meeting: Strengthening monitoring of water supply and sanitation, Bonn, 12-13 June 2013: Presentation of Atlas Version 2

Technical realization

Harmonization

- Country codes need supervision, not automated
- Changes of names, ISO-Codes, spatial extension, dispartment, new states,...
- Finally developed our own system to be flexible for data sources and GIS-based maps, (technical background, not visible for users)
- But: no change of values, no calculation (wb)

Technical realization

Atlas: data sources

Atlas depends on the availability of databases and their preceding collection, data analysis, harmonization, reconciliation, baseline-calculation etc.

Tremendous work we don't want to repeat!

The Atlas-Project will not serve as a focal point for complaints about unexpected figures. The Atlas is a mirror, reflecting sources.

Technical realization

Current data sources

- JMP – Joint Monitoring Programme (1990-2011)
- CISID – Centralized Information System for Infectious Diseases (WHO Europe) (1980-2012)
- Worldbank (1960-2011)
- UNDP – United Nations Developing Programme (1980-2012)
- Future: GLAAS, ENHIS, ...

Technical realization

Current restrictions:

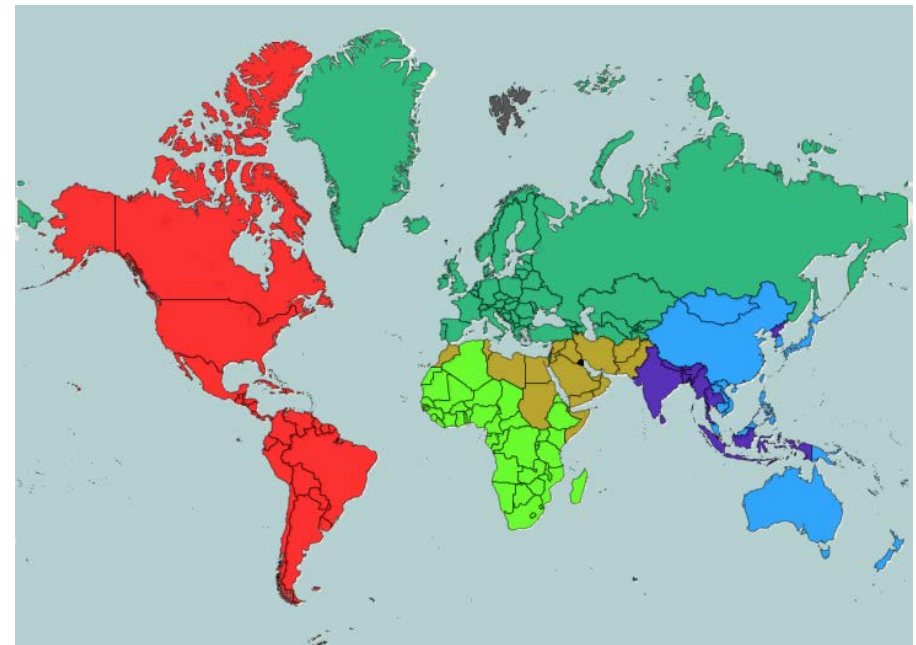

- Spatially: country-wide data
(no subnational information)
- Temporarily: yearly data
(no monthly, weekly or daily information)

Software is capable to manage more and different tempo-spatial resolutions, but is not integrated into Atlas today.

Technical realization

Atlas: countries ver. 1 vs. ver. 2

Technical realization

Indicators included

Depends on availability

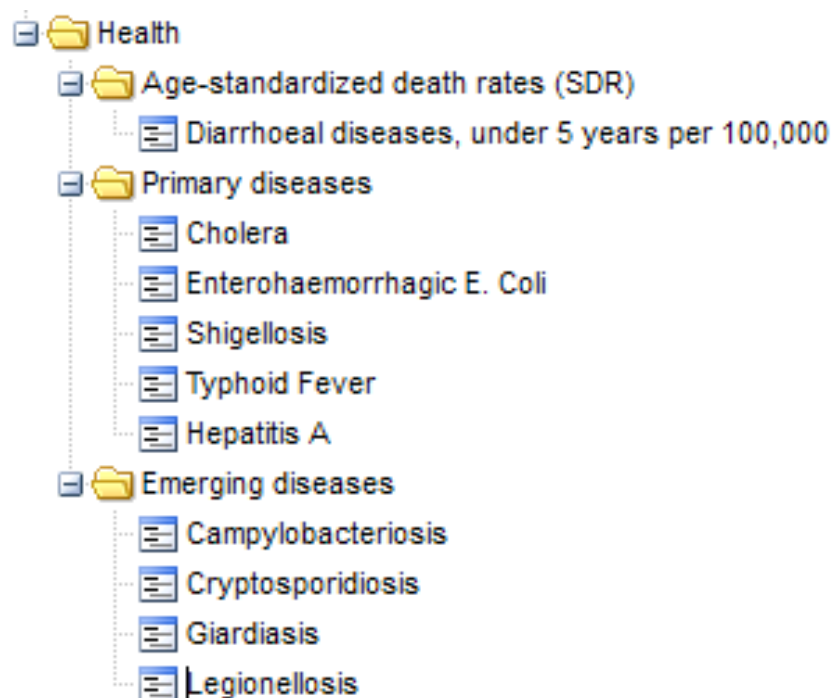

Overall goal:

- Collect aspects related to
 - Water
 - Sanitation
 - Health
- Avoid over-crowding

Technical realization

Health indicators: ver. 1 vs. ver. 2

10, Cases only

Under-five mortality (per 1,000 live births)
Campylobacteriosis
Cholera
Cryptosporidiosis
Enterohaemorrhagic E.Coli
Giardiasis
Hepatitis A
Hepatitis E, acute
Legionellosis
Shigellosis
Typhoid (Paratyphoid Fever)
Typhoid Fever
Health index
Life expectancy at birth (years)

14, Cases and incidences

Layers

- Background data
 - GDP (PPP) per capita
 - HDI / Human Development Index
- Population
- Water
 - Water Resources
 - Drinking water and sanitation coverage
- Health
 - Age-standardized death rates (SDR)
 - Primary diseases
 - Emerging diseases

Map

Information

	Name
1	Albania
2	Andorra
3	Armenia
4	Austria
5	Azerbaijan
6	Belarus
7	Belgium
8	Bosnia and Herzegovina
9	Bulgaria
10	Croatia
11	Cyprus
12	Czech Republic
13	Denmark
14	Estonia
15	Finland
16	France
17	Georgia
18	Germany
19	Greece
20	Hungary
21	Iceland

New features of Version 2:

- documentation of sources, indicators, countries
- layout and usage
- Timeline options
- Enhanced graphic toolset
- Export functions: print, embed, share, present
- Extreme flat hierarchy for easy access
- Apply filter, selection by value-range
- Data lenses, enlarging windows
- Prepared to be published in different languages

To do

- Integration of different languages: Russian!
- Preparation of a collection of predefined layouts
- Integration of indicators
- Automated data update
- ...
