

# Ozone issues (agenda item 8c)

## Questions to be addressed:

- What is the current scientific knowledge and understanding about ozone trends?
- What are the contributions to ozone levels of hemispheric transport of air pollution as well as local peaks, especially in Mediterranean areas?
- What are the impacts on health and ecosystems?

# Schedule

## Short presentations:

- *Augustin Colette:* Current scientific knowledge and understanding about past and predicted future ozone trends
- *Frank Dentener:* Contributions of the hemispheric transport of air pollution to ozone levels as well as local peaks
- *Marie-Eve Heroux:* Impacts of ozone on health – indicator to be used in impact assessments
- *Harry Harmens:* Impacts of ozone on ecosystems – indicator to be used in impact assessments
- *Isaura Rabago:* Ozone issues specific to the Mediterranean in the current and future climate

**Discussion:** Ideas & priorities for future research agenda (2018-2019) to support policy response to Assessment Report and upcoming mid-term review of the Long Term Strategy
