

SIDE EVENT: Natech Risk Assessment and Mapping with RAPID-N

Natural hazard impacts can cause **severe cascading industrial accidents (NATECHS)** with **transboundary effects**.

RAPID-N (<http://rapidn.jrc.ec.europa.eu>) is a unique tool that allows the **rapid analysis of NATECH risk**.

Please join us for this side event hosted by the **EC Joint Research Centre** which will introduce the basics of **NATECH risk assessment** and **demonstrate** the capabilities of **RAPID-N** with case-studies.

Tuesday, December 4th
14:15 - 15:00, Room VII
