integrate renewable energy into energy systems****Working Group on Integrated Water Resources
Management****Fourteenth meeting**

Geneva, 22-24 October 2019

Item 7(a) of the provisional agenda

**Water-food-energy-ecosystems nexus in transboundary
basins****Sustainable renewable energy investments and development:
accounting for water resources and the environment with a
nexus approach**

Note by the secretariat

Corrigendum**Annex****1. Paragraph 1 (b), second sentence**

Delete Identification of financing opportunities, including climate finance, green bonds, blended-finance and co-finance of synergic solutions;

2. Paragraph 1 (c)

For the existing text *substitute* (c) Identification of financing opportunities, including climate finance, green bonds and blended financing and co-financing of synergic solutions;

3. Paragraph 3

For the existing text *substitute*

A similar tool to the one for policymakers (and a related table) can be developed for project developers. Such a tool can help identify and prioritize sustainable RE projects throughout the project development process. It can be addressed to project owners/sponsors, private investors, green funds, banks (commercial and developmental) and developmental organizations, with the aim of providing a tool for selection and facilitation of projects – from a “greenfield” state to full commissioning – that exhibit the most positive cross-sectoral

synergies, while at the same time exhibiting the least, and most directly mitigated, cross-sectoral trade-offs.

4. Paragraph 4, chapeau

For the existing text *substitute* 4. The tool could help stakeholders design and invest in sustainable and bankable RE projects, or nexus-proof and upgrade (i.e. maximize benefits) them:

5. Paragraph 4, table

Delete table.
