

4. Suggested future work in this area for 2020-2022 (1)

1) Raise awareness about the situation of equitable access to water and sanitation :

- Scale up application of The *Equitable Access Score-card* to **support baseline analyses on equity of access to water and sanitation** at the **national and local levels** in up to three countries or subnational regions;
- Develop **training and/or communication materials** on equitable access to water and sanitation ;
- Facilitate exchange of experiences by organizing a **regional workshop on progress made and remaining challenges**, to ensure equitable access to water and sanitation;
- **Promote political awareness of existing inequities** based on the outcomes of self-assessments and raise awareness of the need for action to address the issue in international forums.

4. Suggested future work in this area for 2020-2022 (2)

2) Foster adoption and implementation of measures to ensure equitable access to water and sanitation

- Support development of **up to three local or national equitable access action plans in countries to address inequities in access to water and sanitation** to promote the inclusion of equitable access aspects in strategies or programmes of different sectors and the setting of targets under the Protocol;
- Facilitate **integration of the human rights to safe drinking water and sanitation into national legislation** by providing tailored advice and supporting collection of good practices;
- **Monitor the status of implementation of existing equitable access action plans** in countries and their impact on policies and practices (in collaboration with National Policy Dialogues);
- Support **development of a brochure on good practices to ensure affordable water and sanitation services**;
- **Monitor progress** in this area and provide a platform for exchanging experiences and prompting further progress by organizing **up to two Expert Group on Equitable Access to Water and Sanitation meetings**.
