

Batumi Action For Cleaner Air (BACA)

1

Develop new ambient air quality standards and improve existing air quality monitoring and assessment system

2

Develop electronic air pollution reporting system from point sources

3

Reduce sulphur content in liquid fuels by establishing new fuel quality standards

4

Improve and renovate public transport in Tbilisi

5

Develop and publish a periodical report on national emissions into ambient air from different sectors

6

Provide on-line data on ambient air quality from automatic monitoring stations and quarterly reports on results of passive sampling campaigns

7

Promotion of electric transport and green driving
