Introduction to the SEA Process and the SEA Pilot Project on the Waste Management Action Plan in Georgia

Dr. Maia Gachechiladze-Bozhesku,
UNECE International Consultant on SEA

What is SEA

A systematic & anticipatory process of:

- analysing environmental (social & health) effects of proposed plans, programmes & other strategic actions,
- engaging and consulting the stakeholder, and
- integrating findings into decision-making

SEA as Strategic as its Plan or Programme

EaP GREEN & Pilot SEA in Georgia

SEA Pilot -
National level

As per the WM Code of Georgia:
The WM Strategy and Action Plan to
be adopted by the end of 2015

Pilot SEA => Waste
management (WM)
sector

The pilot SEA for the WM Action
Plan was launched in late July 2015!

Adjusting and Integrating the Pilot SEA and WM Strategy + Action Plan (1/3)

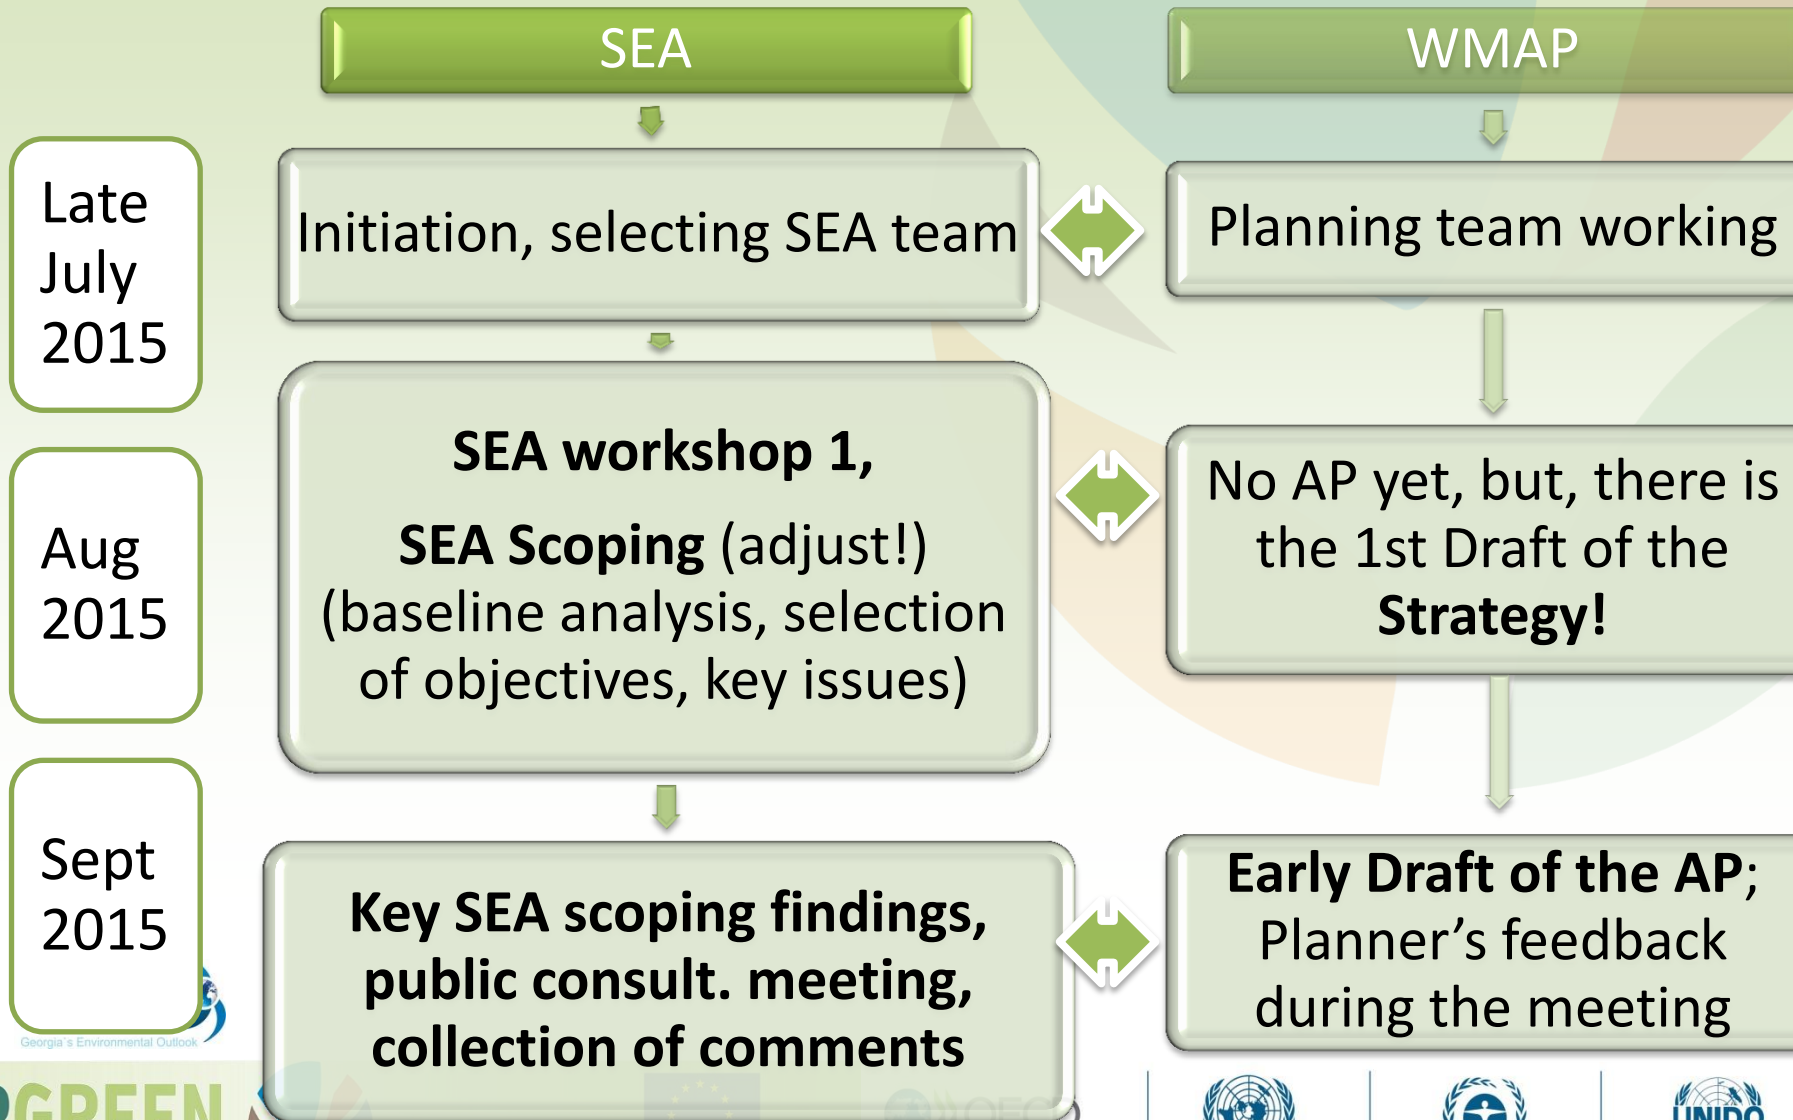

No one SEA will be the same - need to adjust SEA to a strategy assessed, considering:

- its focus,
- planning process,
- time resources,
- structure of the document,
- governmental agencies,
- other stakeholders involved, etc.

Action Plan is a very high level document = same as the Strategy
SEA tried to look beyond

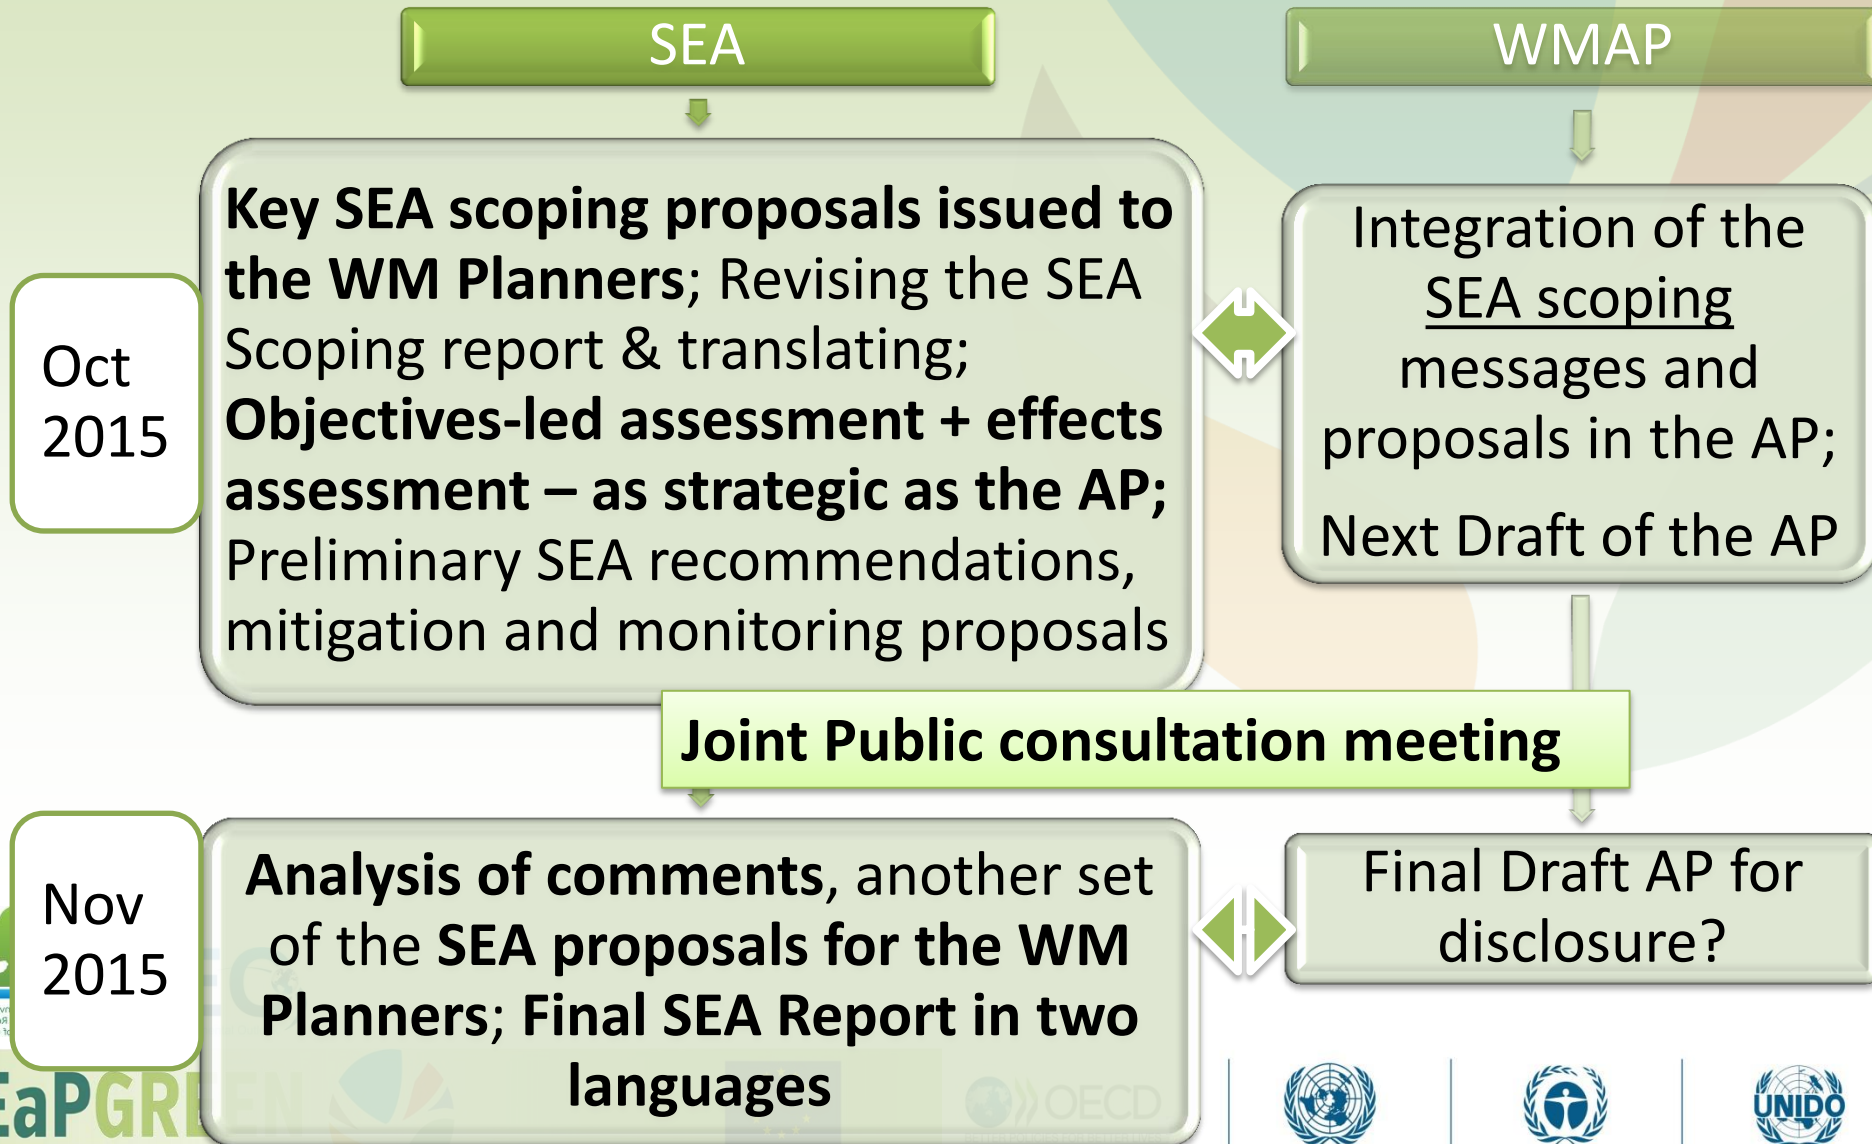

Adjusting and Integrating the Pilot SEA and WM Strategy + Action Plan (2/3)
