¹² E.g., geography or biology. For higher education, “subject” means “course”.

¹³ A project is interpreted as a discrete activity with its own time allocation rather than a teaching/learning method.

	<i>there are additional courses/projects provide, which also support ESD. In these courses participation is optional.</i>
Indicator 2.3	A whole-institution approach¹⁴ to SD/ESD is promoted
Sub-indicator 2.3.1	Do educational institutions ¹⁵ adopt a “whole-institution approach” to SD/ESD?

¹⁴ A “whole institution approach” means that all aspects of an institution’s internal operations and external relationships are reviewed and revised in the light of SD/ESD principles. Within such an approach each institution would decide on its own actions, addressing the three overlapping spheres of Campus (management operations); Curriculum; and Community (external relationships).

¹⁵ For higher education institutions: whole-university, whole-college or whole-faculty approach (including inter-faculty approaches).

Yes No

- IEP has developed the current curricula/programs of study for compulsory and secondary education, which incorporate the principles of ESD (methods, expected learning outcomes, holistic approach, etc.). In addition, IEP has developed the educational assessment system. IEP supports school units (0-3) by providing the implementation guidelines. The assessment is mandatory for school units and promotes a whole-institution approach.
- Some schools have participated in the project “The sustainable school through indicators”
- The National Museum of the Lesvos Petrified Forest has adopted a whole-institution approach and integrated SD issues into its educational programs.
- The Charter of the Greek Universities for SD, adopted by all Rectors, is promoting the Whole Institution Approach to Universities.
