Good practices and success stories on mainstreaming gender equality in education and/or ESD

1.	Name of country:	Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Hungary, Italy, Netherlands, Turkey
2.	Name of organization/ project/programme	Ark of Inquiry project
3.	Good practice (title)	Pedagogical scenarios for adapting science learning activities
4.	Target group	students (age 6-18) and teachers
5.	Brief description of good practice	The Ark of Inquiry project is an international collaboration in science education, with special focus on responsible research and innovation. Partners developed pedagogical scenarios: one of these focuses on gender inclusion. The scenarios help teachers to reshape the activities collected on Ark of Inquiry platform so that they better fit their pedagogical aims by creating a more suitable learning environment. RRI has a strong sustainability component in the project's view, which is present in many (but not all of the) activities.
