

ESD AND ENVIRONMENTAL EDUCATION IN SLOVAKIA

Boglárka Ivanegová
Directorate for Environmental Policy, EU and
International Affairs

Ministry of Environment of the Slovak Republic

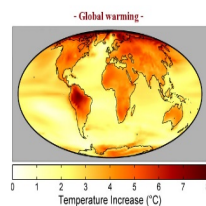

- Nature and biodiversity Protection

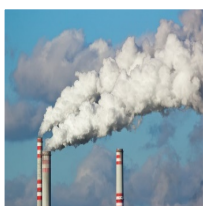

Water

- Climate Change

Geology

- Air

EU and International Policy

- Waste

INFORMAL Environmental Education

Environmental strategy 2030

- To be ratified by the end of 2018
- Environmental education is amongst the key priorities
 - Goal 1: to improve the quality and efficiency of ESD and EE
 - Goal 2: to encourage sustainable lifestyles, production and consumption
 - Goal 3: to support sustainable tourism and promote experiential education in the field

Green education fund

To promote environmental awareness and environmental education.

Focus areas:

- climate action and low carbon mobility,
- circular economy,
- quality of life and green infrastructure,
- eco-innovations.

155EUR distributed amongst 28 projects

Obstacles

- Sectoral, thematic fragmentation - hard to grasp the multi-disciplinary nature of ESD
- Terminological confusion
- ESD dependent on teacher enthusiasm
- Formalism
- Lacking experience on evidence-based policy making

Plans up to 2020

- Accredited ESD courses for teachers (project planning and implementation)
- Publication of an ESD encyclopaedia
- Enhanced collaboration with NGOs and youth organisations
- Adoption of new activating community-based projects (Roots&Shoots, GLOBE)
- Impact assessment and evaluation of ongoing activities
- Regional strategies for environmental education centres
- Education platform for the circular economy

Let's be in touch and share our know-how!
