

Gap Analysis on Reporting Environmental SDGs by Georgia

Main Challenges

There is no official “nationalization” matrix for SDGs in place

SDGs, its targets and indicators are not adequately integrated in strategic environmental planning documents of Georgia

Links between SDG targets are not identified adequately

Not all environmental SDGs and its targets are nationalized by MEPA

Baseline and target data are not identified for all nationalized indicators of MEPA

No reporting or monitoring system is in place to disseminate information on SDGs implementation

Insufficient financial, technical and human resources

Relevant Planned Actions

Approval of official “nationalization” matrix for SDGs by the Government of Georgia

Further integration of environmental SDGs in Medium Term Expenditure Framework (MTEF) and strategic documents by MEPA

Analysis of interlinkages between SDG targets is in the process

Nationalization of further environmental SDGs and its targets by MEPA (esp. SDG6)

Gradual definition of baseline and target data for all nationalized indicators of MEPA

Launching of SDG Monitoring System (SDGMS) and SDG Toolkit by the Government of Georgia

Capacity building of MEPA and GEOSTAT staff in cooperation with FAO and other int. organizations

Regional Conference on Environmental Data
Geneva, Switzerland

8 May 2019
