**CEP Special  
Session,**  
Feb. 2016

**Eighth EFE  
Ministerial  
Conference,**  
June 2016

**18<sup>th</sup> Session**  
Geneva,  
June. 2016

The Working Group agreed at its Sixteenth Session to assess progress on establishing Shared Environmental Information System (SEIS) and to develop a reporting mechanism under eight thematic areas and a list of 67 data set.

The Seventeenth Session continued this work and presented a reporting mechanism for the review of progress in establishing the SEIS and a draft evaluation report for the EFE Ministerial Conference in Batumi.

# Eighth Environment for Europe Ministerial Conference

- The Eighth EFE Ministerial Conference opened on Wednesday, 8 June 2016, in Batumi, Georgia.
- The conference held a session on “Keeping the pan-European environment under review” (agenda item 2(B)) on the first day.
- Included a discussion of progress in establishing the Shared Environmental Information System (SEIS) in support of regular reporting in the pan-European region.

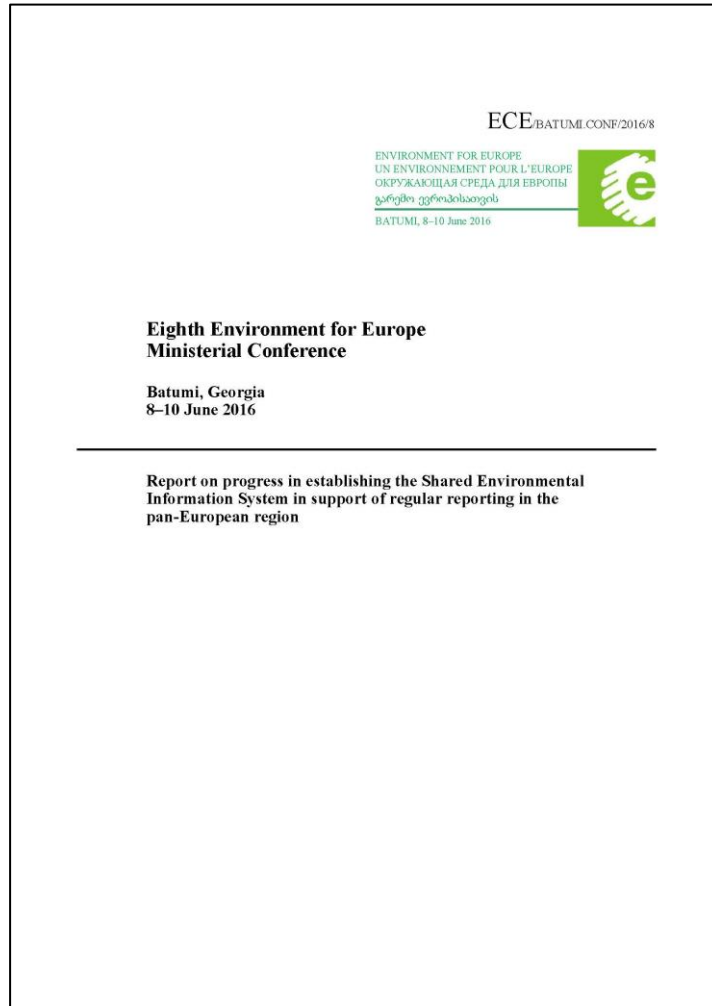

# Eighth Environment for Europe Ministerial Conference

- Key findings and policy messages of the European regional assessment of the Sixth Global Environment Outlook (GEO-6).
- Adoption of the Batumi Ministerial Declaration on the final day of the conference.

“10. While welcoming progress in developing the Shared Environmental Information System (SEIS) to support a regular process of environmental assessment, we invite countries to continue their efforts and to further develop their national information systems to have SEIS in place in the countries of Europe and Central Asia by 2021. In this regard, we note the value of UNEP Live and the Group on Earth Observations as global knowledge-sharing platforms. We welcome the launch of the European regional assessment of the Global Environment Outlook, as the regular pan-European environmental assessment. The GEO-6 Assessment for the pan-European region is built on existing national, sub-regional and thematic assessments, including The European environment - state and outlook 2015 report produced by the European Environment Agency in 2015.”

# Implementation of the recommendations for the production and online sharing of selected environmental indicators

# Implementation of the recommendations for the production and online sharing of selected environmental indicators

## The review process...

- Desk study conducted in the period between August 2015 and January 2016
- Secretariat collected all relevant information related to each environmental data set available online
- Data sets were rated according to the five criteria for review
  - Online accessibility
  - Update regularity
  - Production methodology
  - Data interpretation and use
  - Data source

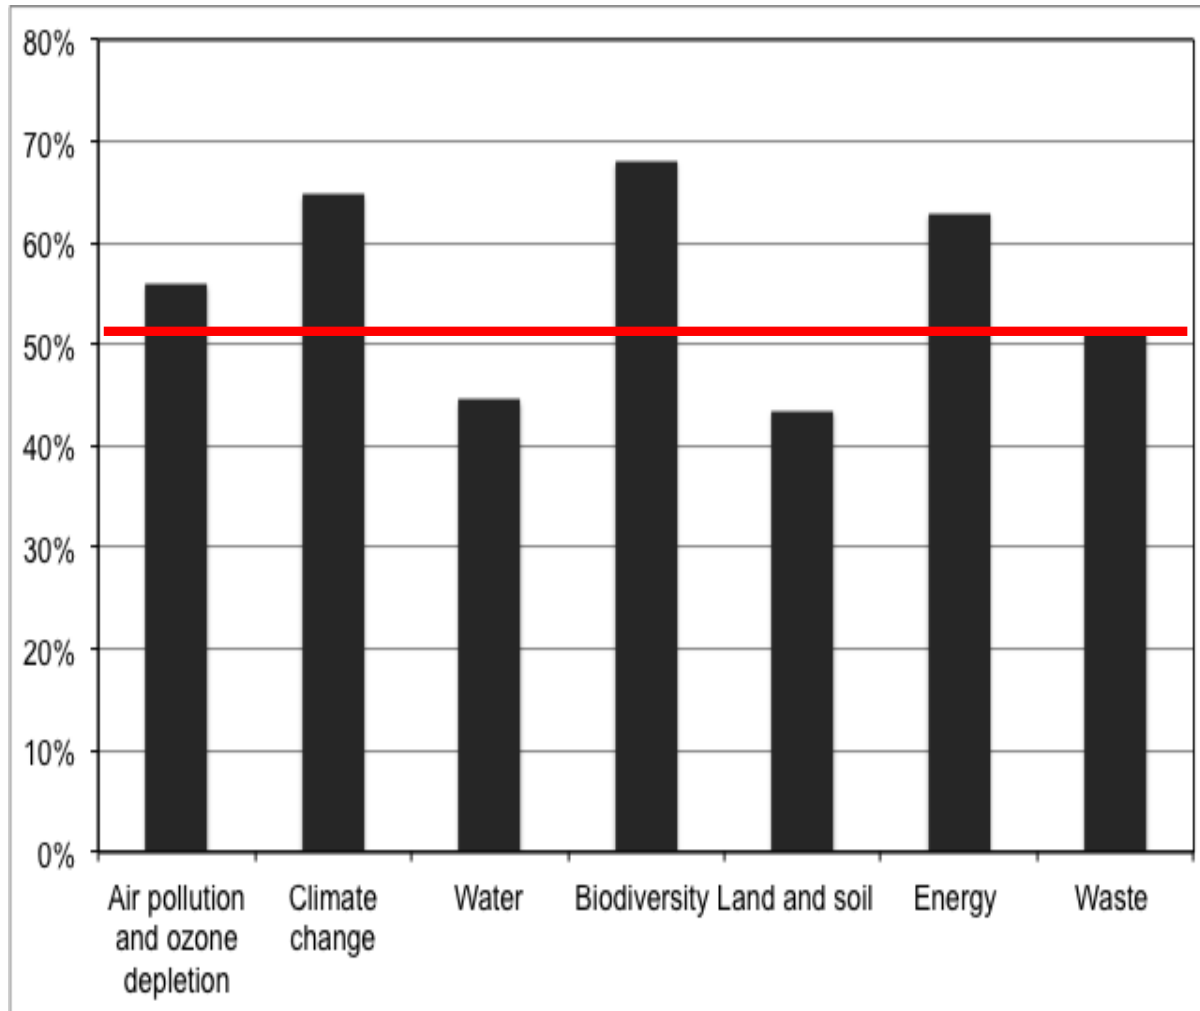

# Implementation of the recommendations for the production and online sharing of selected environmental indicators

## Results

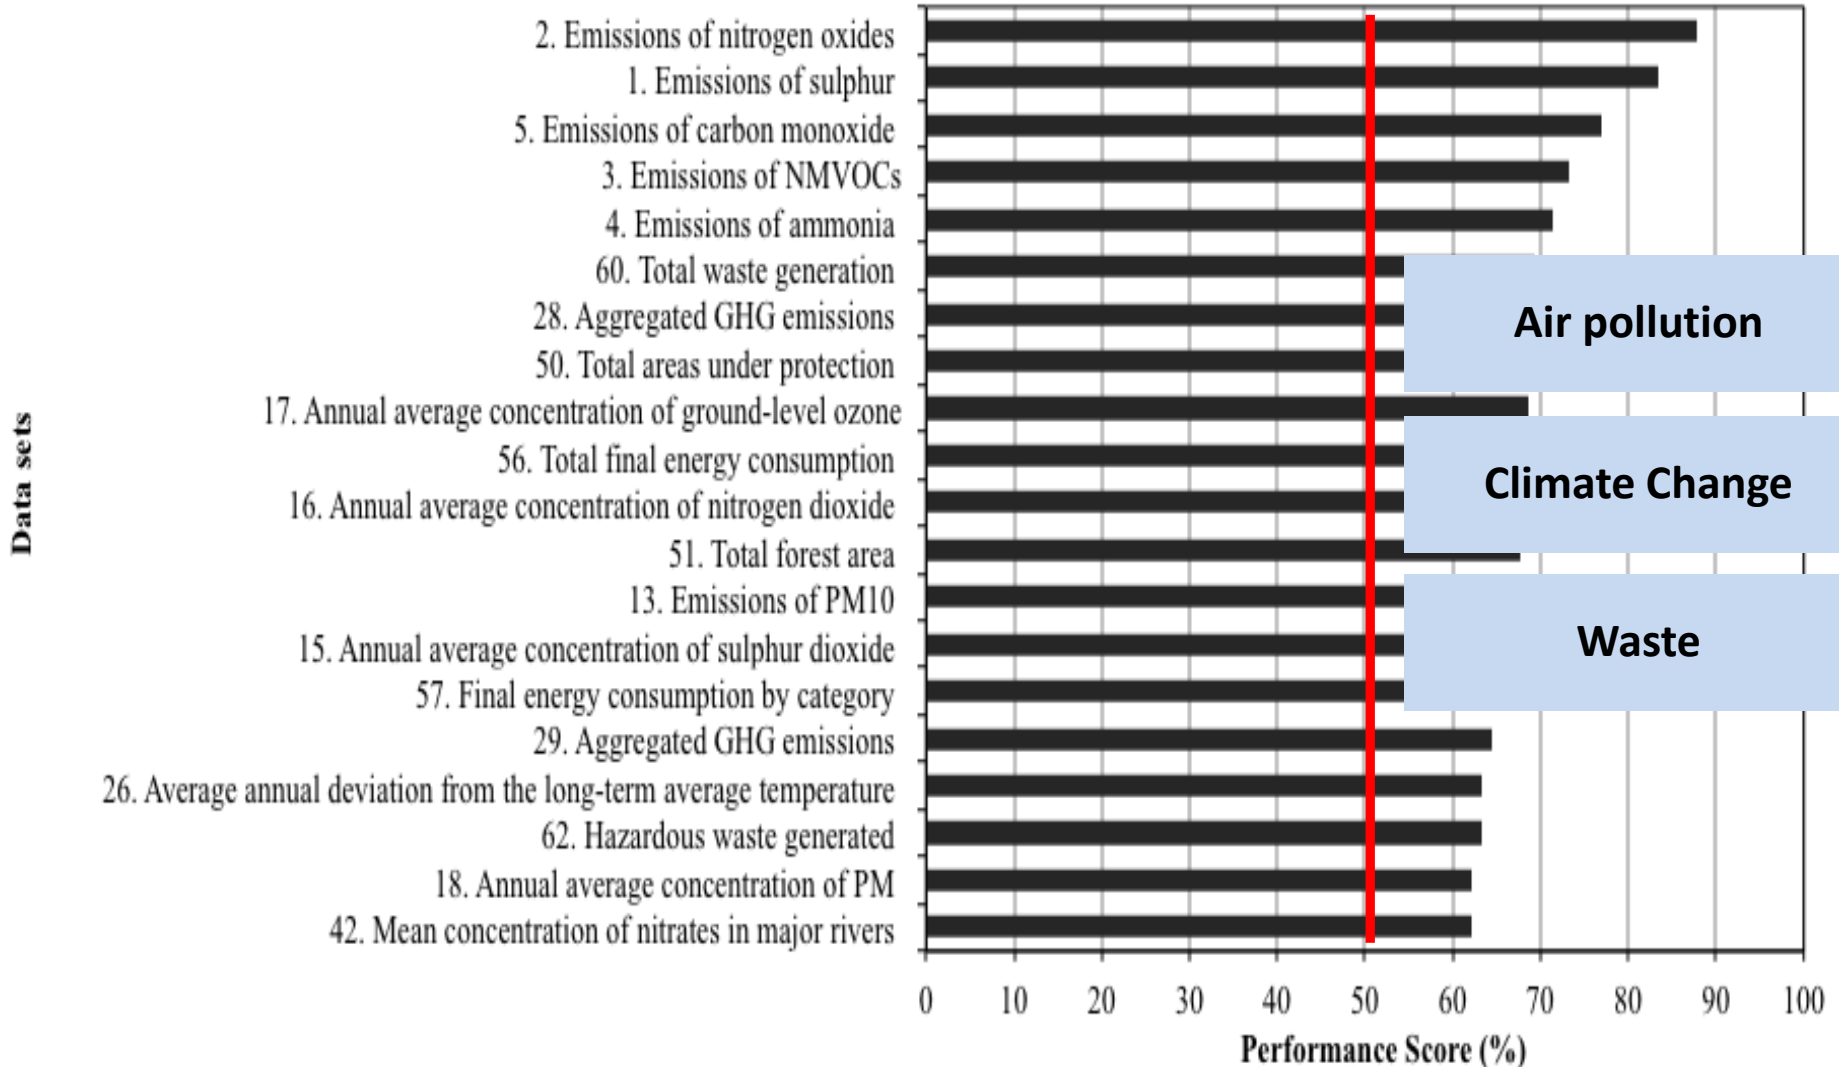

- The 67 data sets and related information has been assessed for **53 pan-European countries**.
- **22 countries** have provided the secretariat with their comments and validated their SEIS status as of January 2016.
- Out of the 67 SEIS-related data sets, **51 per cent** were available across all national websites.

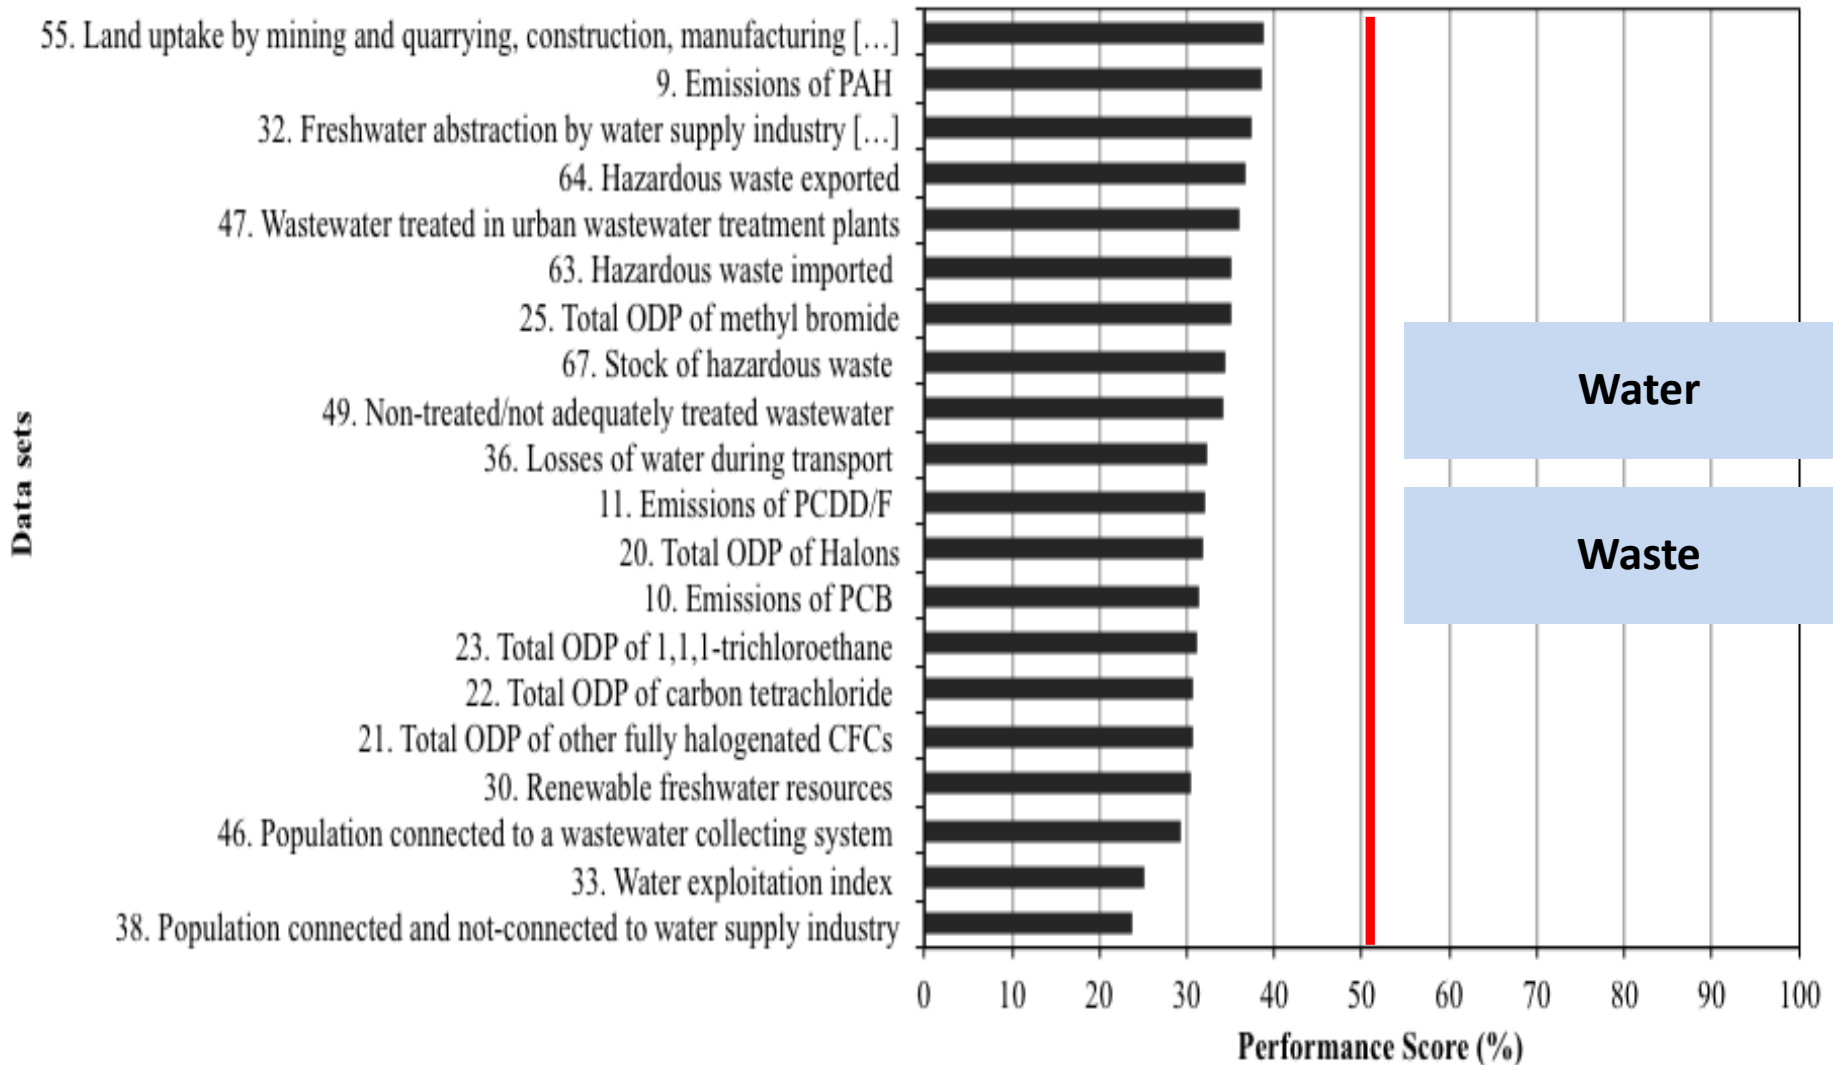

# Implementation of the recommendations for the production and online sharing of selected environmental indicators

# Implementation of the recommendations for the production and online sharing of the selected environmental indicators

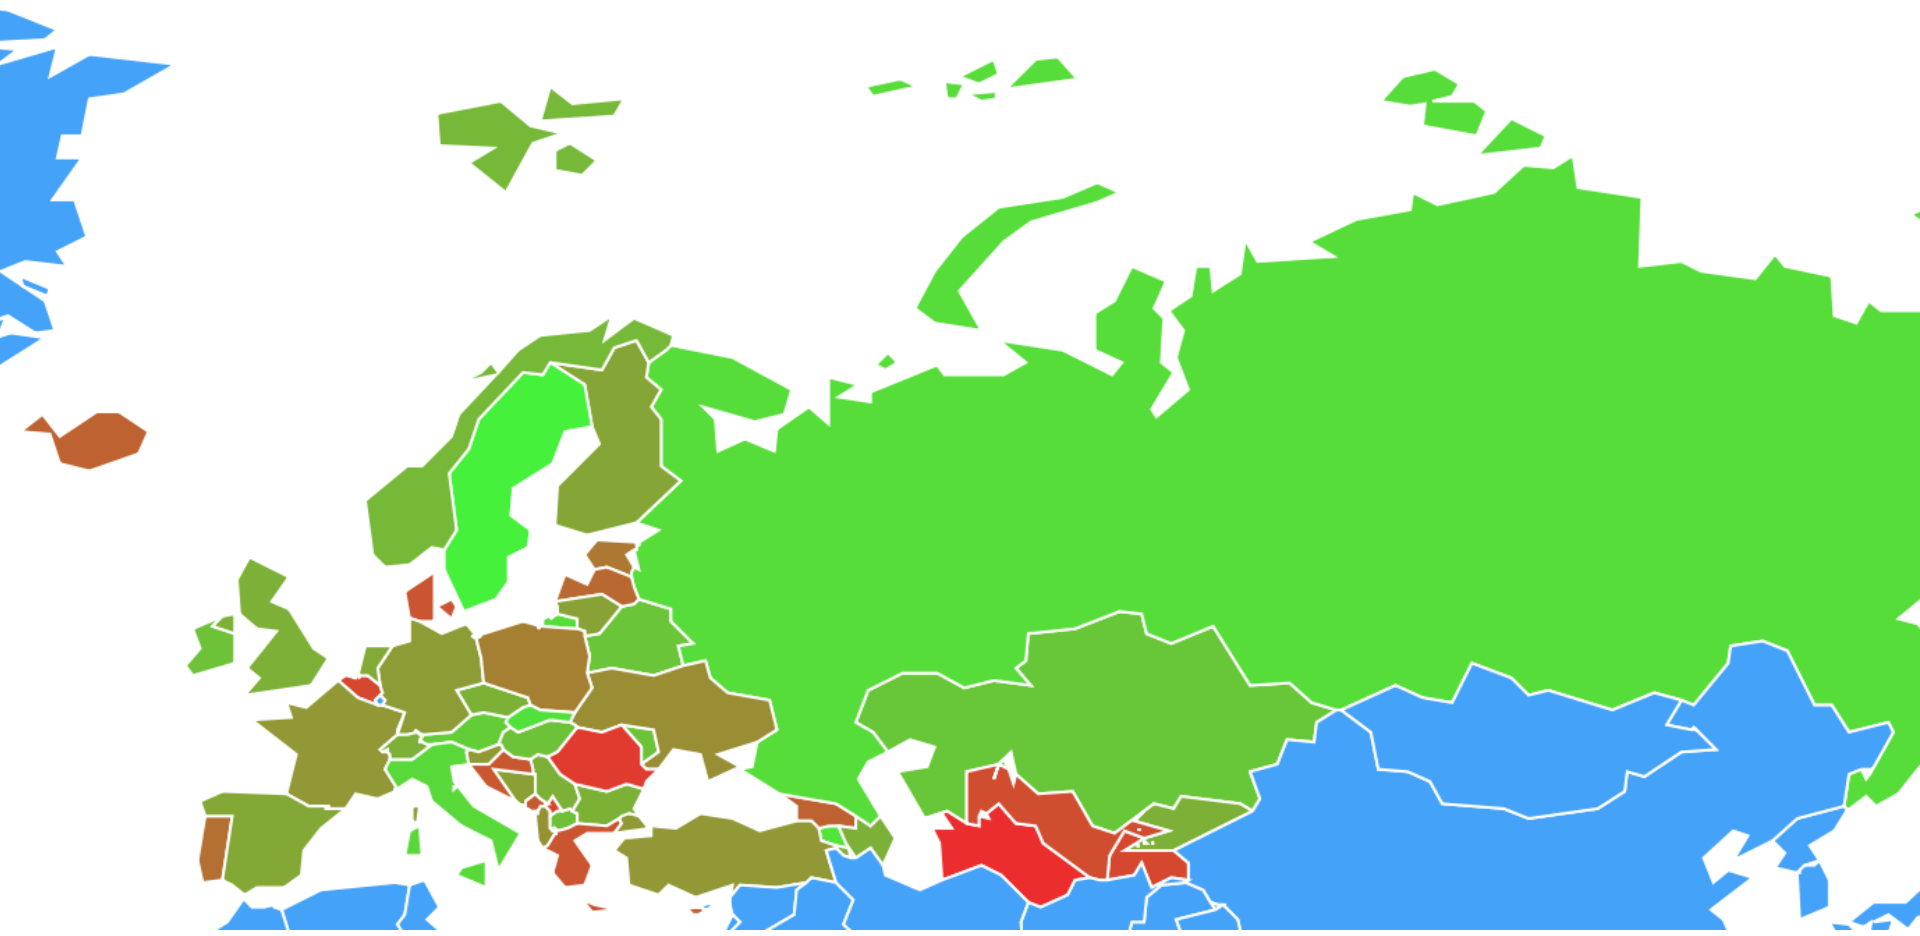

# Implementation of the recommendations for the production and online sharing of the selected environmental indicators

Value

# Implementation of the recommendations for the production and online sharing of selected environmental indicators

## Improving the availability and accessibility of SEIS data sets and related information

- Significant progress has been made by the reviewed countries in establishing SEIS.
- Case study examples
  - Belarus
  - Italy

# Implementation of the recommendations for the production and online sharing of selected environmental indicators

## Conclusions

- The drive towards establishing the SEIS and to facilitate data harmonisation has had a positive impact.
  - 32 countries in the pan-European region have improved their SEIS performance score.
  - Only a limited number of countries for which only a few or no data sets could be found online.
- Results have highlighted performance gaps and areas in need of improvements.
  - Updating data sets with more recent content.
- Move beyond evaluating SEIS implementation across thematic areas and data sets to include an assessment of the content (e.g. data quality) as part of the reporting mechanism.

# Next steps for the annual SEIS progress reporting: Reviewing the review criteria, SEIS targets and performance indicators.

- Pilot a quality definition and associated quality components, taking into account specificities of the data producer.
- Integrate quality considerations as an inherent part of the self assessment.
- Updating review criteria in parallel with developing the reporting application.
- Develop a simplified quality report as part of the self assessment.

# Improving visibility and networking

The Working Group on Environmental Monitoring and Assessment (WGEMA) was established in 2000 to serve as an instrument for UNECE Member States to:

- Provide recommendations
- Propose action plans, and
- Improve coordination of international initiatives

in environmental monitoring, assessment and reporting.

Working Group on Environmental Monitoring and Assessment (WGEMA) Facebook group page. The page features a cover image of a forest landscape with the UNECE logo. The group is a closed group with 13 members. A pinned post by Filip Aggestam from 8 June at 16:48 features a video presentation titled "Keeping the environment under review" by UNECE Executive Secretary Christian Friis Bach. The video content is summarized as: "UNECE Executive Secretary Christian Friis Bach about GEO 6 and how to ensure that regional and national networks work together." The page also includes sections for 'Add Members', 'Description', 'Group Type' (Team), 'Tags' (Environmental Monitoring and Assessment), 'Group Chats' (No group chats), and 'Create New Groups'.
