

REC Statement at MoP-2 PRTR Protocol

Agenda item 3 Promotion and capacity building

3 (a) Coordination mechanisms and synergies

The Regional Environmental Center for Central and Eastern Europe (REC) welcomes the results of the Global Roundtable, the work of the International Coordinating Group on PRTRs and the OECD Task Force on PRTR. These efforts build synergies and provide valuable resources for Parties and Signatories and assist in the ratification and implementation of the Protocol. Similar roundtables are also needed in the future as they provide feedback and suggestions on how PRTRs could be used for reporting for other international agreements as well as for sustainability reporting.
