

Training Session on Identification of Hazardous Activities

21.-22. October 2008, Minsk, Republic of Belarus

Good practice on using the processed data on hazardous activities

Ing. Tomáš Trcka

Ministry of Environment
Slovak Republic

Usage of collected data:

Article 6 – Prevention (Annex IV and V)

Article 7 – Decision – making on siting (Annex V Article 1– 8, Annex VI)

Article 8 – Emergency preparedness (Annex VII, Annex V Article 1–5)

Article 9 – Information to, and participation of the public (Annex VIII, Annex V Article 1–4, 9)

Article 10 – Industrial accident notification systems (Annex IX)

Prevention

- demonstrate the safe performance of the hazardous activity

Decision-making on siting

- establishment of policies on the siting of new hazardous activities

- establishment of policies on significant developments in areas which could be affected by transboundary effects of an industrial accident

Emergency preparedness

- inform each other of their on – site and off – site contingency plans
- compatibility of contingency plans

Information to, and participation of the public

- ensure the adequate information for natural and legal persons in areas capable of being affected by an industrial accident
- public has opportunity to participate to know prevention and preparedness measures

Information channels:

- standard communication channels passive /active
- bilateral / multilateral meetings of competent authorities / points of contact

Annex VIII – Information to the public pursuant to Article 9

- The name of the company, address of the hazardous activity and identification by position held of the person giving the information.
- An explanation in simple terms of the hazardous activity, including the risks.
- The common names or the generic names or the general danger classification of the of the substances and preparations which are involved in the hazardous activity, with an indication of their principal dangerous characteristic.
- General information resulting from an environmental impact assessment, if available and relevant.
- The general information relating to the nature of an industrial accident that could possibly occur in the hazardous activity, including its potential effects on the population and the environment.
- Adequate information on how the affected population will be warned and kept informed in the event of an industrial accident.
- Adequate information on the action the affected population should take and on the behavior they should adopt in the event of an industrial accident.
- Adequate information on arrangements made regarding the hazardous activity,

including liaison with the emergency services, to deal with industrial accidents, to reduce the severity of the industrial accidents and to mitigate their effects.

- General information on the emergency services' offsite contingency plan, drawn up to scope with any offsite effects, including the transboundary effects of an industrial accident.
- General information on special requirements and conditions to which the hazard activity is subject according to the relevant national regulations and/or administrative provisions, including licensing or authorization systems.
- Details of where further relevant information can be obtained.
