

# Streamlining adaptation strategies at different levels

Introduction to session 2

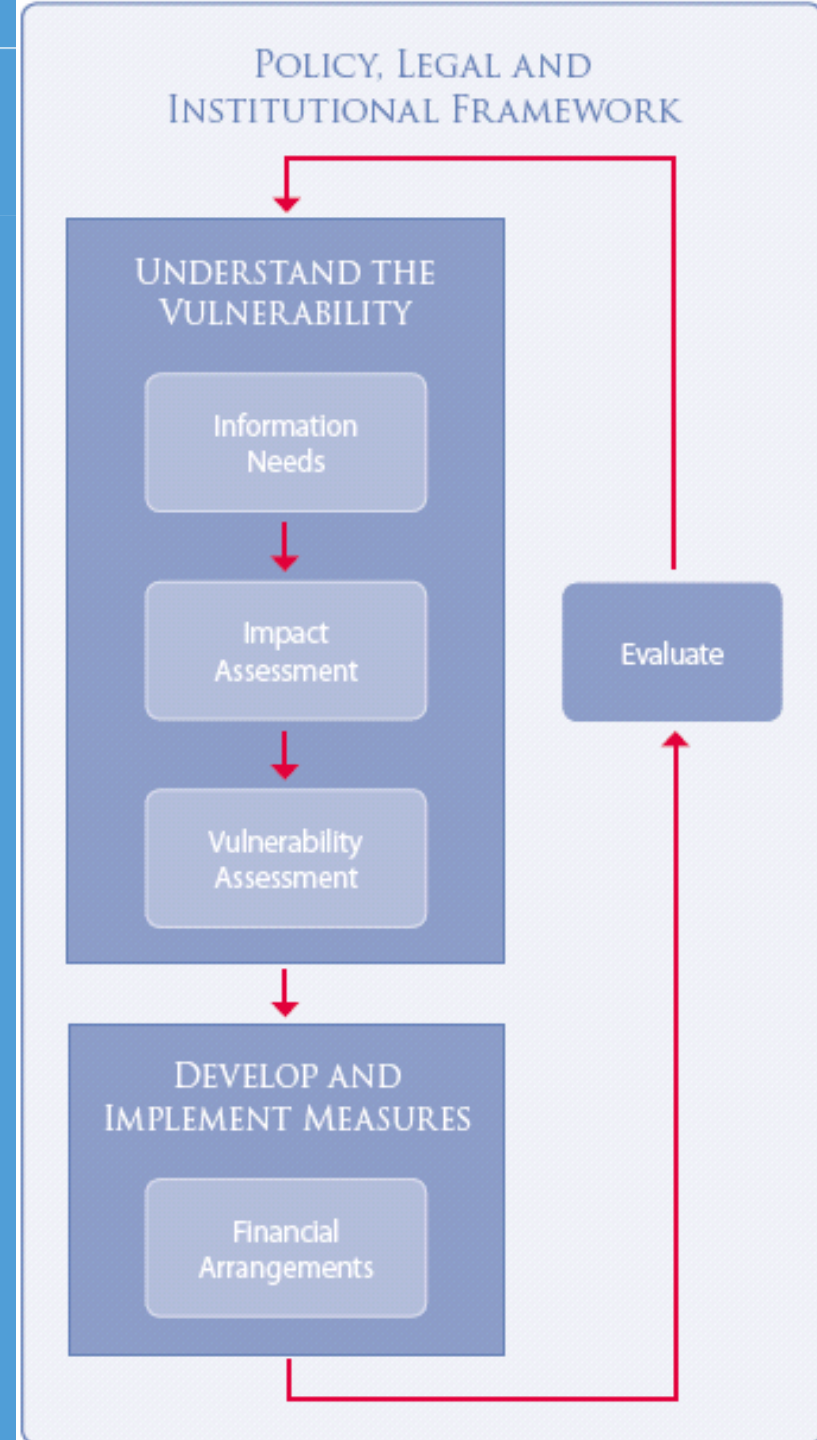

Jos Timmerman

Alterra Wageningen UR

# Goal of the session

- How to ensure that adaptation strategies are effective at different levels?
- Strategy on national or transboundary level – measures often at local level - how to integrate over these levels?

# Presentations

---

Effectiveness of adaptation strategies

Ms. Kathleen DOMINIQUE, OECD

Danube: the first transboundary adaptation strategy

Mr. Raimund MAIR, ICDPR

Local transboundary adaptation strategies in the Meso-American region

Mr. Carlos FLORES, El Salvador

Baltic Sea region-wide climate change adaptation strategy

Mr. Ole KRARUP LETH, Danish Meteorological Institute

---

# Questions to be answered

---

- How to ensure that transboundary adaptation strategies will be integrated into the national plans and strategies and vice versa?
- What are the differences between adaptation strategies at different levels - is there an added value of one over the other?
- What elements should be targeted at what level (local – national – transboundary)?

---

Thank you for  
your attention
