

Identifying solutions

Roberto Martin-Hurtado

roberto_martin@hotmail.com

The 5is

Institutions

Clarifying roles and responsibilities

- Monitoring of basin resources
- Supporting the application of SD principles in economic and sectoral planning

Developing a consultation process

- to review the impacts of national and sectoral development strategies on basin resources

Reviewing the mandate of the ISRBC

- to discuss (and eventually act) on all relevant basin resources

Information

Monitoring of basin resources

- Quantity
- Quality

Forecasting

- Floods and droughts
- Water demand

Improving access and sharing

- Further development of ISRBC database
- Improving online access of data

Instruments

Regulatory instruments

- Transboundary EIA
- SEA
- Minimum environmental flows

Economic instruments

- For behaviour change
- For raising funds

Information instruments

- Guidance and training of productive agents
- Awareness-raising among consumers

Infrastructure

Promoting multiple and flexible use

- Dams
- Irrigation and drainage systems

Expansion and upgrading

- Wastewater treatment

Coordinating infrastructure investments

- Hydropower
- Other renewable resources

International coordination and cooperation

Legal instruments

- FASRB and its protocols
- EU Directives

Transboundary planning processes

- Sava River Basin Management Plan
- Flood Risk Management Plan

Regional integration and harmonization

- EU accession and approximation

Task A

1. Write down (in post-its) three solutions to improve the management of the Drina basin resources
2. Let's read out those solutions (one per participant to start with)
3. Place your post-its on the wall
