### **About the event**

UNECE Country Profiles on Housing and Land Management provide a detailed analysis of the housing and land management situation in the countries and highlight challenges which are of particular concern to the country. The country profiles also make practical recommendations to the government on how to improve the country's housing and land policies. The UNECE Country Profile on Housing and Land Management in Tajikistan was prepared and published in 2011 - 2012. This Country Profile publication in English and Russian is available at <http://www.unece.org/index.php?id=27165>.

This event will bring together key national and international stakeholders in housing and land management in Tajikistan. Outcomes of the Country Profile on housing and land management of Tajikistan, which was prepared and published by the UNECE in 2012, will be presented and discussed. Representatives of the Government of Tajikistan will report on their activities in developing the country's housing sector and land management. Representatives of the UN agencies, the World Bank as well as other donors will report on the progress of their projects on land, spatial development and housing in Tajikistan. The meeting participants will discuss possible future cooperative activities, which would support the Government of Tajikistan in implementing the Country Profile policy recommendations.
