

Fifth Meeting of the GGP International Working Group

Ljubljana, 18-20 January 2007

Generations and Gender Program Current Stage in Poland

Ewa Frątczak

Polish Governmental Council

Institute of Statistics and Demography
Warsaw School of Economics

Structure of the presentation

- 1. Pilot GGS study**
- 2. Organization of the first panel**
- 3. The GGS questionnaire for the first panel**
- 4. Current situation**
- 5. Polish Contextual Data Base**

1. Pilot GGS study

1. The pilot study for the GGS the I. Way in Poland took place in June 2006
2. 5 voivodeships took part in the pilot study
3. In each voivodeship 20 questionnaires were fulfilled
4. The structure of the respondents in the panel study by age and sex:

Sex	Age: 18-44	Age: 45-79	Total
Male	35	16	51
Female	29	20	49
Total	64	36	100

1. Pilot GGS study

- Average time of the interview for 5 voivodeships: 1,5 – 2 hours
- Number of the fulfilled questionnaires and number of refusals, for example:

Voivodeship	Fulfilled	Refusals	Total
Łódzkie	20	13	33
Poznańskie	20	6	26
Total	40	19	59

- The results of the pilot study: the reduction of the size of the pilot GGS questionnaire about 25 %.

2. Organisation of the first panel

Generations and Gender Programme belongs to the programme of the public statistic in Poland in 2006.

Institutions:

- **Central Statistical Office**
- **Polish Governmental Population Council**

2. Organisation of the first panel

Tools

Two forms of the questionnaire are used in the GGS survey; the first one is for the interview with a household, while the second one is exclusively for the interview with a selected person aged 18-79 years, i.e. the so-called individual respondent. The information about the entire household and its particular members will be written down in the first questionnaire (regardless their age).

The questionnaires for the GGS survey will be completed in a traditional way, i.e. in a paper form; then the data included in these questionnaires will be registered in electronic system in particular Statistical Offices.

2. Organisation of the first panel

Sample size and frame

20 000 dwellings were selected in accordance with the Programme of Statistical Surveys for 2006.

Sampling units comprise dwellings. One person aged 18-79 years is selected in each household in the dwelling (women or men).

The preliminary estimate of the number of completed questionnaires for individual respondents indicate about 80% of the sampled persons.

2. Organisation of the first panel Scheme

A two-stage sampling were applied for the sample selection with additional sampling of an individual respondent.

- I. Stage – staistical region (based on the census 2002 updated enumeration areas)
- II. Dwelling(s)

2. Organisation of the first panel Units

All household will be surveyed in each selected dwelling. This stage of the survey will provide information concerning the whole household and particular members of each household (regardless their age). Moreover, in a secondary process, families will be determined.

Then the selected persons aged 18-79 years will be interviewed; one in each household (method of the respondent' selection: last birthday)

2. Organisation of the first panel

Time and Data

PLANS FOR 2006

Time of the first panel: IV quarter of the 2006 and I quarter of the 2007

Available data: end of 2007, beginning 2008

Ch.10. Value orientations and attitudes	Ch.11. (all + additionally questions for preference theory)
	Ch.9. Partner's activity and incomes – totally excluded

4. Current situation

The realization of the GGS I panel for IV Quarter 2006 has been canceled according to the decision of the V-ce President of the Central Statistical Office , official letter of 20 October 2006.

Reason for the decision – not clear ?

The total CSO budget for GGS for 2006 – was at the level ca. 3.3 mln PLN

(exactly: 3 243 500,- zł)

4. Current situation

November, December 2006 and the first half of January 2007 in the Central Statistical Office took place a deep control by the officers from Supreme Chamber of Control

(NIK)

Now, we are waiting for „ Control PROTOKOL “.
