We are on the winning side  
but the fight is not over yet

# Inequalities

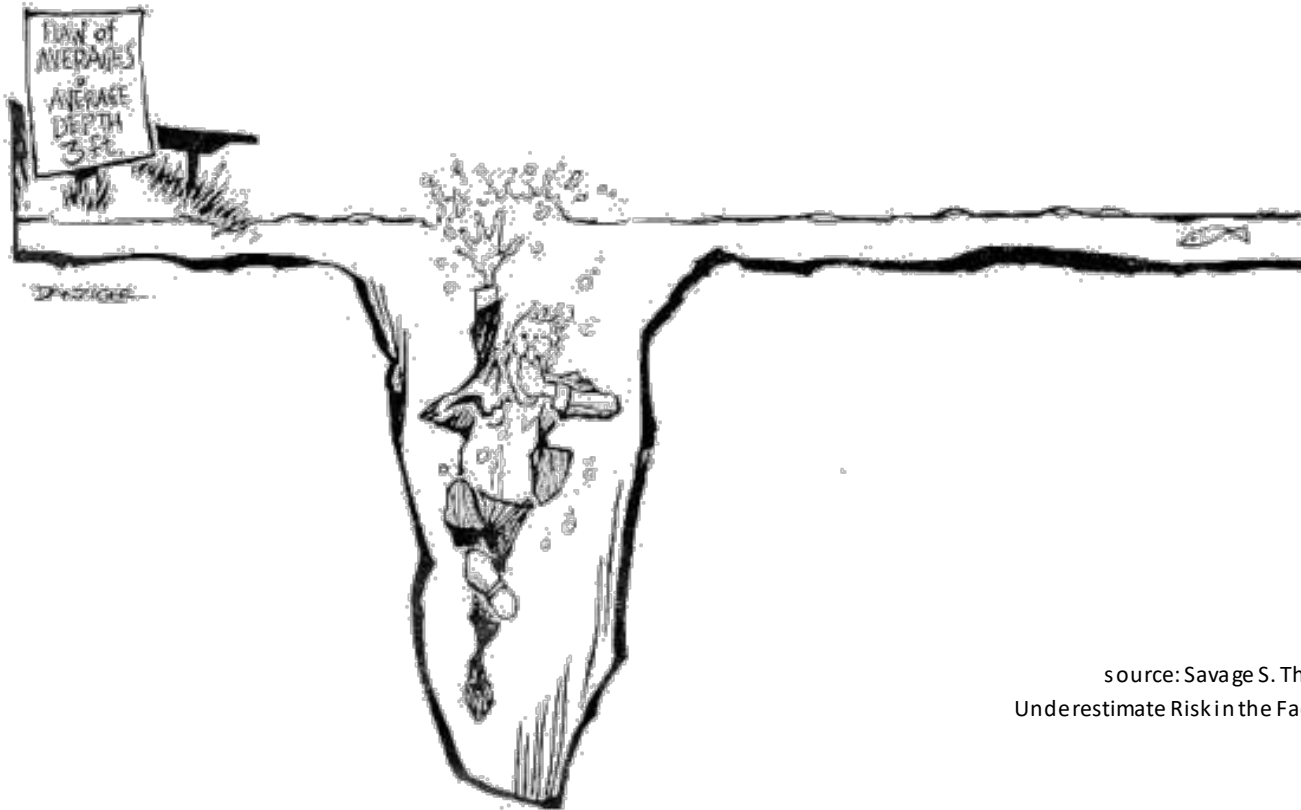

new challenges continue to prevent many women, men and couples of different ages and backgrounds from enjoying the right to the highest attainable standard of SRH over their life course (Section 2.1). Achieving the SDG targets on SRH and eliminating **inequalities** in access to SRH care require the universal provision of an essential, integrated package of services and information (Section 2.2).

The heterogeneity of family forms and patterns in the UNECE region  
Chapter 1 demands that regional  
social protection

# Flaw of averages

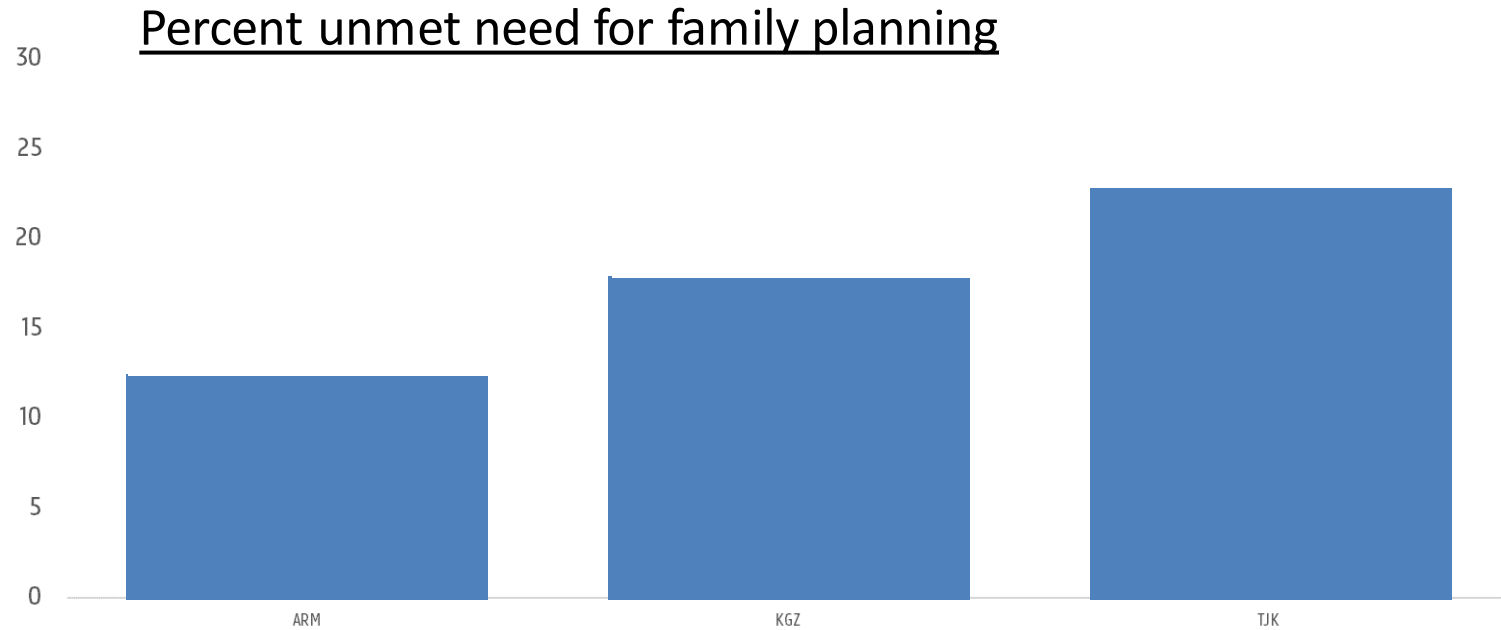

Man drowning in a river that was, on average, only three feet deep

*The test of our progress is not whether we add more to the abundance of those who have much it is whether we provide enough for those who have little.*

Franklin D. Roosevelt

# Commitment

ly on increasing diversity in family structures and the  
lation care. need to protect vulnerable family members.

first Meeting the SRH needs of all persons requires  
often the removal of access barriers, commitments to  
the advancing gender equality and the  
ning strengthening of health systems for the  
ions universal provision of an essential package of  
der SRH services and information from birth to old  
the age that responds to changing  
ind without financial overburdening  
ler package of SRH  
he care

# Performance monitoring

analysed available data in six key areas: reproductive health, maternal health, violence against women, comprehensive

The findings from this assessment were presented in a society organizations.<sup>80</sup> As a result, the Ministries of Health agreed to update their performance monitoring tool. The SRHR issues such as human trafficking, domestic violence and population development were also successful in the mid-term report.<sup>81</sup> SRHR issues were also successful in the demographic and population development and to violence with a view to ensuring the prevention.

# Discrimination

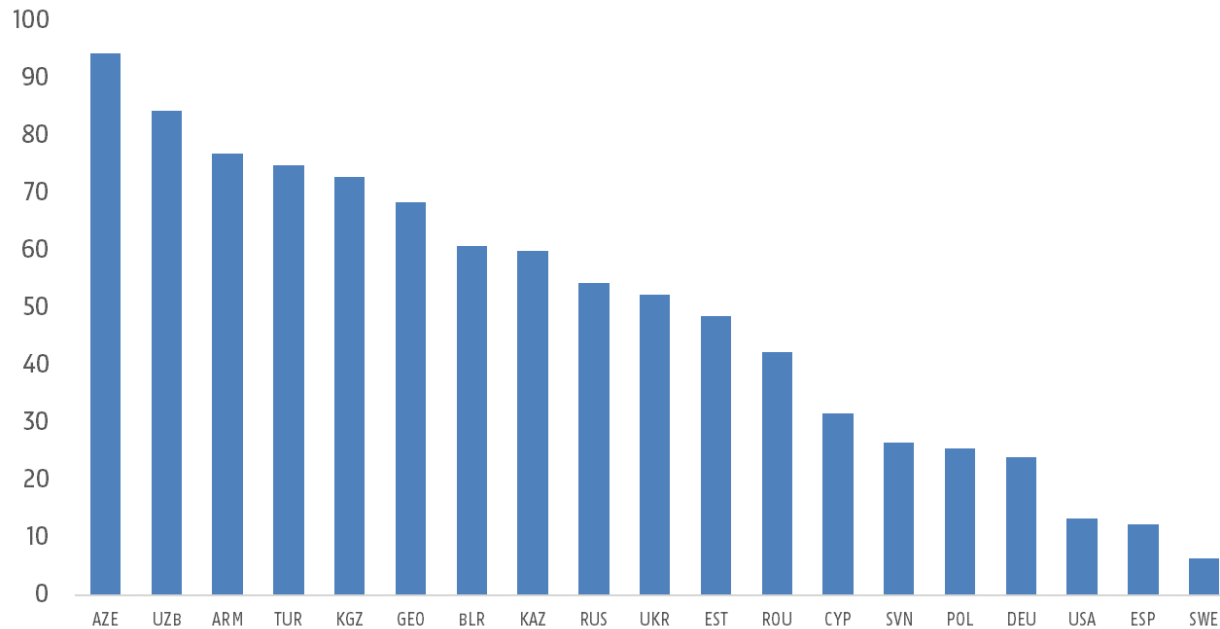

healthier lives.

Stigma and discrimination toward key at-risk populations remain expressed in the form of government regulations, access to health employment limitations, among countries in the UNECE region.

# People living with HIV/AIDS

## Percentage of the population that would not like to have people who have AIDS as neighbours
