 - ▶ Polish speaking persons aged 18-79 (at the moment of survey), living in private households in Poland
 - ▶ Main sample of 20000 dwellings and two additional samples of 20000 dwellings each
- ▶ Two stage sampling scheme:
 - ▶ FSU: 4000 of enumeration census areas
 - ▶ SSU: 20000 of dwellings
- ▶ Respondent's selection:
 - ▶ Last birthday method
 - ▶ Data collection method:
 - ▶ Face-to-face, PAPI

GGG-PL Wave 1

- ▶ Questionnaire - 11 sections, the structure consistent with the core questionnaire for Wave 1, formatted according to modes used in households based surveys run by Statistics Poland

The first version of the questionnaire included 369 questions the pilot survey reports indicated that the the questionnaire was too long

The final version of the questionnaire is composed of 246 questions , the selection based on a careful overview of the synthesis of national questionnaires provided by Swedish colleagues and our preferences for the future comparative analyses

GGG-PL Wave 1

- ▶ NEW:
 - ▶ Section 6 – five additional questions related to reproductive health (infertility and treatment methods)
 - ▶ Section 7 – two additional questions on life satisfaction, sources of social support
 - ▶ Section 8 - 12 questions re labour market biographies of R
 - ▶ Section 11 – two additional questions on religion, two additional questions about women’s attitude towards employment

They refer to issues of high relevance in Poland
