

Joint UNECE/Eurostat Work Session on methodological issues involving the integration of Statistics and Geography
(Tallinn 25-28 September 2001).

**Study topic (ii) NEW TECHNOLOGICAL SOLUTIONS
INCLUDING THOSE BASED ON ONLINE DATA ACCESS**

Notes for the Discussion

Prepared by Marja Tammilehto-Luode

The papers discuss new technological problems and solution in the field of:

- data collection (WP 12, WP18, WP 19)
- data storage and management (WP 14, WP 32)
- data analysis (WP 13)
- data dissemination (WP 12, WP 4, WP 16, WP17, WP33)

Participants in the session should look in the discussion at these potential technologies from the following viewpoints:

- How relevant are these technologies in your own organisation?
- Where are the gaps or major problems needing solutions or further progress that are not yet available?
- Are there potential new uses or new user groups for these technologies?
- What are the major problems in the use of new tools – major premises for using "new technology"
- How well do these technologies fit into existing processes?
