# CODED database

Eurostats Concepts and Definitions Database

Includes currently about 3700 concepts and definitions

Available on the web (Eurostat home and CIRCA)

Others: Business Methods

RAMON (Eurostat classification server)

# Community Census Programme 2001

- - data collection from the NSIs
  - Tables on urban areas
- - Procedure for ad hoc data requests
- - dissemination of census data.

# Data collection from 2001 censuses

- Table templates were prepared in excel for the Table Programme
- Templates and instructions were sent to the NSIs in the end of August
- Two new tables were added on urban areas and sent to the NSIs in November
- Dealine is the end of June 2003

# Statistics on urban areas from 2001 censuses

Data on urban areas will be produced and delivered to Eurostat according to tables 38 and 39 of the Table Programme.

These tables have become, in effect, tables 41 and 42 of the Table Programme.

# Statistics on urban areas from 2001 censuses

Concept of urban area builds on the concept of locality in the UNECE-Eurostat census recommendations

Minimum size of an urban area is 2000 inhabitants

Big localities with several population centres can be divided into several urban areas

# Statistics on urban areas from 2001 censuses: Table 41

## Simple data on

Usual resident population by age and sex

Usual resident population by sex and country of  
citizenship

Usual resident population by sex and  
household status

Usual resident population by sex and  
highest educational attainment

Economically active population by age

# Statistics on urban areas from 2001 censuses: Table 42

**Private households by number of members**

**Dwellings by type of building**

**Conventional dwellings by occupancy status**

# Procedure for ad hoc data requests

- Eurostat will propose that countries would create an Eurostat census file in ASCII format using standard person records, which would contain the variables of the Table Programme.

# Dissemination of census data

- Data will be checked and validated as soon as it is received
- - Data will be transferred to New Cronos on country/table basis
- - No big publication
- - A set of Statistics in Focuses on specific themes and groups of countries (10 - 12)
- - CD-ROM when all the data will be received

# Documentation of national censuses

Covers 32 European countries

Harmonized country reports

Comparative analysis

A web site?

# UNECE-Eurostat Task Force on families and Households

Proposed and approved in the meeting of Directors of social statistics in April 2002

- Evaluate questions and tables on households and families in 2001 census round
- Compare census results with data from other sources
- Propose improved recommendations on households and families for the 2010 census round

The work will cover period 2003 - 2006
