Summa summarum

1. Need for neighbourhood statistics (N.S.)

2. How to make N.S.

3. How to disseminate N.S.

Sample size

How much detail is necessary,
   and allowed?

1. Age, sex, ethnicity
       stratification / standardisation
2. Person, household, family
3. More variables increase the noise level

Times, they are a-changing

There are always good & bad neighbourhoods

Dynamics of characteristics of neighbourhood in 10..20 years

Changing boundaries : influence for SDC
