

UNECE

Virtual Discussion

How are National Statistical Offices contributing to managing the COVID-19 disaster?

June 10th

Isaak Pacheco Izquierdo

1. WHAT WERE THE MOST URGENT AND UNEXPECTED QUESTIONS/TASKS ASKED TO YOUR NSO?

- According to its attributions, INEGI does not concentrate information from the Ministry of Health, so INEGI's response to COVID-19 is focused on evaluating its impact on relevant socio-demographic indicators in addition to employment and consumer confidence.
- So far, the tasks have not been unexpected and it has been possible to deliver the required information.

2. MAIN EXPERIENCES TO SHARE

- **Telephone Survey of Occupation and Employment (ETOE)**

Shows decreases in labour market and in the employed population, as well as increases in under-employment.

- **Telephone Survey of Consumer Confidence (ETCO)**

Shows indicators on the degree of population's satisfaction with their economic situation, their family and that of the country.

- **Analytical Display for COVID-19**

Heat maps present information related to the COVID-19 pandemic and displays geo-referenced information at local level.
