CIS-STAT

Mid-year population: examples of data discrepancies with CIS-Stat

Country	Deviation, %	Year
UN demographic yearbook		
Armenia	7,6	2012
Belarus	1-1,6	2004-2008
Kyrgyzstan	2-5	2003-2012
Tajikistan	1-1,7	2005-2008
UN DESA		
Armenia	6-10	2003-2010
Kazakhstan	2,2-2,5	2009-2010
Kyrgyzstan	1,7-2,7	2004-2010
Moldova	1-7,3	2003-2009
Tajikistan	1-1,5	2007-2010
World Bank		
Armenia	5,8-10,3	2003-2011
Tajikistan	1-1,5	2006-2012
UNECE		
Azerbaijan	1,5-1,7	2006-2007
Belarus	1-1,6	2003-2008
Uzbekistan	1,3-1,8	2004-2009

NORTH

- *UN DESA* refers developing regions to “South”
- *World Bank* refers as the “South” countries with low and middle income, to the “North” - high-income countries
- *IOM* uses the Human Development Index

SOUTH

INTERNATIONAL ORGANIZATIONS

World Bank uses a five-year intervals to display the data on migration, publishes data on the total number of migrants (persons born in the territory of another State) and net migration.

UN DESA provides information on:
migration balance with use of five-year intervals, given in the long time series (since 1950);
total number of international migrants (average for the year, broken down by gender), the proportion of migrants in the total population, as well as the rate of change of the total number of migrants per year.

IOM displays the total number of arrivals and departures of migrants on a certain date, as well as the direction of migration flows.

UNECE (Migration Clearing House) in its database provides information on the annual basis on the following indicators: the population by the place and country of birth and citizenship; long-term migration by country of arrival/departure and citizenship.

Current indicators of migration statistics

The number of arrivals and departures for permanent residence broken down by country of arrival / departure, sex and 5-year age groups

The number of internal migrants by sex and 5-year age groups, urban and rural areas

Revised indicators of migration statistics

The number of arrivals and departures for permanent residence broken down by country of arrival / departure, sex and 3 main age groups (highlighting 15-29 years age group)

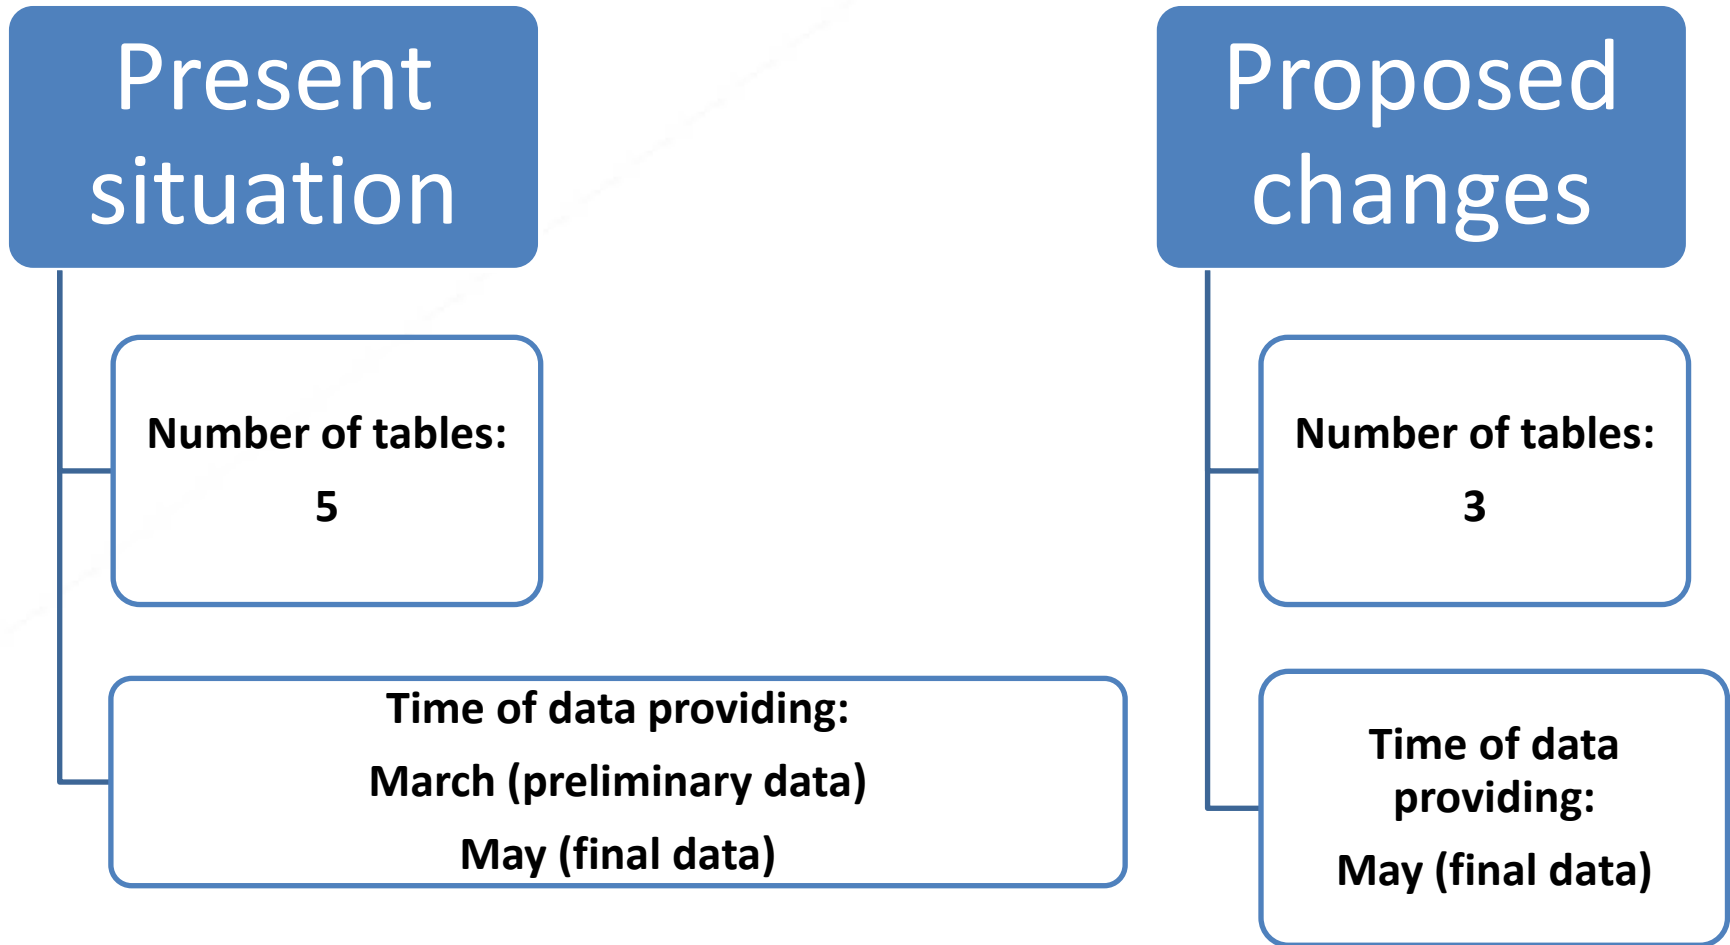

The number of internal migrants by sex and 3 main age groups (highlighting 15-29 years age group)

Distribution of international migrants by educational level

Distribution of international migrants by purpose of visit:
work
education
other reasons

Proposed changes in CIS-Stat questionnaires:
