Directorate Social Statistics

UNECE Work Session on  
Migration Statistics  
Geneva  
30 October 2017

# Longitudinal Study of immigrant cohorts 2010-2012 in Austria

- Use of administrative registers in Austria for register-based census since 2011
- register-based statistics in central domains as a by-product
  - Population & Migration statistics since 2002
  - Labour Market statistics since 2009
  - Educational Attainment statistics since 2009
- Linkage of data through pseudonymised PIN
  - Shift from case-based to person-based statistics
- Cohort-approach → statistics for specific groups
  - previously only available through surveys

# Reduction of cohort size during the first 5yrs after immigration

Reference Year, Length of Stay		2010	2011	2012
Foreign Citizens	First-time immigrants	74.992	86.513	99.891
	< 6 months	18%	17%	16%
	6 to < 12 months	13%	11%	15%
	1 to < 2 years	10%	12%	10%
	2 to < 5 years	13%	13%	k.A.
	Cohort after 5 years	33.637	40.328	k.A.
	<i>in % of original size of cohort</i>	45%	47%	k.A.
EU-MS since 2004	First-time immigrants	24.552	32.701	38.938
	< 6 months	22%	20%	18%
	6 to < 12 months	16%	12%	17%
	1 to < 2 years	11%	13%	11%
	2 to < 5 years	12%	11%	k.A.
	Cohort after 5 years	9.610	14.257	k.A.
	<i>in % of original size of cohort</i>	39%	44%	k.A.

# Size of cohort 5 yrs after immigration

# Labour market participation of Foreign Citizens living in AT

Source: Statistics Austria, Register-based labour market careers.

# Labour market participation of Citizens of EU-MS since 2004 living in AT

Source: Statistics Austria, Register-based labour market careers.

# Labour market participation of Third Country Nationals living in AT

Source: Statistics Austria, Register-based labour market careers.

# Labour market participation - Total

Source: Statistics Austria, Register-based labour market careers.

# Labour market participation - Women

Source: Statistics Austria, Register-based labour market careers.

- Relevance of temporary & short-term migration for AT → 30% of cohort stays <1 year
- Cohort size more than halved after 5 years
- Labour market integration is quicker for EU-Citizens than for Third Country Nationals
- Differences mainly through lesser participation rates of women
- Participation rates of migrant cohort reach average of migrant group after about 5 years
- Analysis for refugee cohort 2015 currently limited, as register-based labour market statistics have time-lag of 2 years
- No data on Educational attainment abroad → limited interest
