

The UNECE Online Database on Population Projections Metadata

Paolo Valente
UNECE

Eurostat/UNECE Work Session on Demographic Projections
Belgrade, 25-27 November 2019

UNECE Task Force on Population Projections (2015-2017)

Outputs:

- Recommendations on communicating population projections
- Database of metadata about national and international population projections

Database content

STATISTICS

- Mainly based on “**Appendix C - Suggested template for reporting metadata about population projections**” of the recommendations

Variables:

Country/ies to which the projection refers

Organization

Title of the projection

Type of projection model used

Year & month of dissemination

Projection start date

Projection end date

Production frequency

Sub-national geography

Population concept

Characteristics: Household type

Characteristics: Citizenship

Other characteristics/special projections

Number and type of scenarios/variants

Levels of prediction intervals

Level of detail for age

Age groups

Maximum age or age group

Level of detail for projection year

Email address for direct contact by users

Links to dissemination products

How to access the database

UNECE projections metadata

How the database looks like

STATISTICS

Population Projections

Country/ies to which the projection refers	Sub-national geography	Population concept	Characteristics: Marital status	Characteristics: Household type	Characteristics: Citizenship	Other chara
Armenia		de jure	no	no	no	no
Austria	Yes-bottom up (consistent with national geography & produced with bottom-up approach)	de jure	no	no	no	
Belgium	Yes-bottom up (consistent	de jure	no	yes	yes	

Database updating

STATISTICS

Two options:

- National contacts on population projections can login and update information or create new lines if needed
- Inform UNECE of the changes

→ After this meeting: UNECE will send email messages to national contacts and participants in this meeting

→ In future: whenever information needs to be updated, please send an email message to UNECE, or update the database directly
