

Coordination of Sustainable Development Indicators in Lithuania

10/04/2017

EXPERT MEETING ON STATISTICS FOR SUSTAINABLE
DEVELOPMENT GOALS

From MDG to SDG indicators

- Resolution of the Government of the Republic of Lithuania on the Approval & Implementation of the National Strategy for Sustainable Development (2003) served as a prerequisite for identification & production of MDG or related indicators
- Strategic directions were identified

The initiative resulted in 81 indicator published,
of which 21 indicator is covered
by the list of indicators of Agenda 2030

EXPERT MEETING ON STATISTICS FOR SUSTAINABLE
DEVELOPMENT GOALS

Background for starting SDG framework

- Initiatives discussed since 45th sessions of the United Nations Economic and Social Council
- Work undertaken by UNECE, CES, OECD, Eurostat in various fora
- Declaration on the role of national statistical offices in measuring & monitoring the Sustainable Development Goals approved in the plenary session of the Conference of European Statisticians (CES) in June 2015

The Declaration:

“Calls upon national governments to support national statistical offices in their key role in measuring & monitoring SDGs in countries”

EXPERT MEETING ON STATISTICS FOR SUSTAINABLE
DEVELOPMENT GOALS

Lithuania's position on SDG

Position of Statistics Lithuania on SDG initiative :

- importance of comparability of indicators
- preparation of methodologies for calculation of indicators
- development of the system of indicators & monitoring must be implemented by the country
- detailed level of indicator aggregation will require additional resources & raises confidentiality issues
- cooperation of international organizations in developing missing methodologies & establishing clear data transfer mechanisms to avoid duplication of efforts

DEVELOPMENT GOALS

National SDG indicators in Lithuania

- Indicators of Agenda 2030 for Sustainable Development prepared & published on Official Statistics Portal in 2017
- Agreements with 20 ONAs signed on cooperation in provision of information & release of indicators on the single Official Statistics Portal
- Further work with ministries & other institutions continued in terms of data provision by supplementing with the national indicators on sustainable development

Number of indicators produced or to be produced in short-term perspective

Overview of current producers of SDG indicators

Availability of indicators by Goal

SDGs related plans

- Resolution of the Government of Lithuania (13 March 2017) on the Approval of the Plan of Implementation of the Programme of the Government foresees setting of coordination mechanism in 2017
- Tasks to be set in Statistics Lithuania Strategy for 2018–2022 related to implementing Agenda 2030 for Sustainable Development
- Contribute to improvement of the UN, CES, OECD & Eurostat list of sustainable development indicators, development of methodologies

10/04/2017

EXPERT MEETING ON STATISTICS FOR SUSTAINABLE
DEVELOPMENT GOALS

- Update national indicators of sustainable development
- Efficiently coordinate work with institutions responsible for SDGs
- Maintain close cooperation with the country's scientific community
- Inform the public about objectives of Agenda 2030 for Sustainable Development & progress in implementation
- Identify new data sources & partnerships for developing of missing indicators

10/04/2017

EXPERT MEETING ON STATISTICS FOR SUSTAINABLE
DEVELOPMENT GOALS

Challenges encountered

- Very long & non-exhaustive list of indicators
- Lack of definitions of indicators & data sources
- New surveys needed & new data sources & partnerships to be identified
- Some indicators do not belong to official statistics
- Clear distribution of responsibilities in the country to be finalized & formalized
- Increased burden on NSI
