

Final Waste Disposal

What is the indicator?

- Total incinerated or landfilled
- Each sector incinerated or landfilled
- Hazardous – included in or excluded from total and sector?
- Landfilled: both controlled and not controlled?

Relevance/purpose

- “Response to the efficiency of the waste management system”???
- Again: what happens with uncontrolled landfill?
- This indicator together with the one on recycling/reuse should give 100%???

Methodology and guidelines

- Does not give any guidance
- should consider only “registered waste management system” ???

Standards and references

- OECD/Eurostat Questionnaire
- EU Waste Manual
