

# **Pilot compilation of environmentally related tax revenue accounts in the Russian Federation**

Igor REPIN (RepinIA@gks.ru)

ROSSTAT

**The 4th Joint OECD/UNECE Seminar on the Implementation of SEEA  
Geneva, 20-21 February 2019**

# International methodological guidelines and recommendations

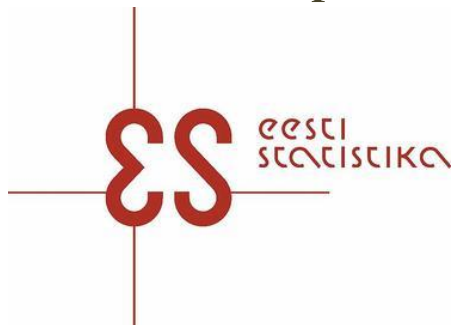

- The proposed OECD methodological guidelines for compiling ERTR accounts in line with the SEEA (June 2018, draft version)

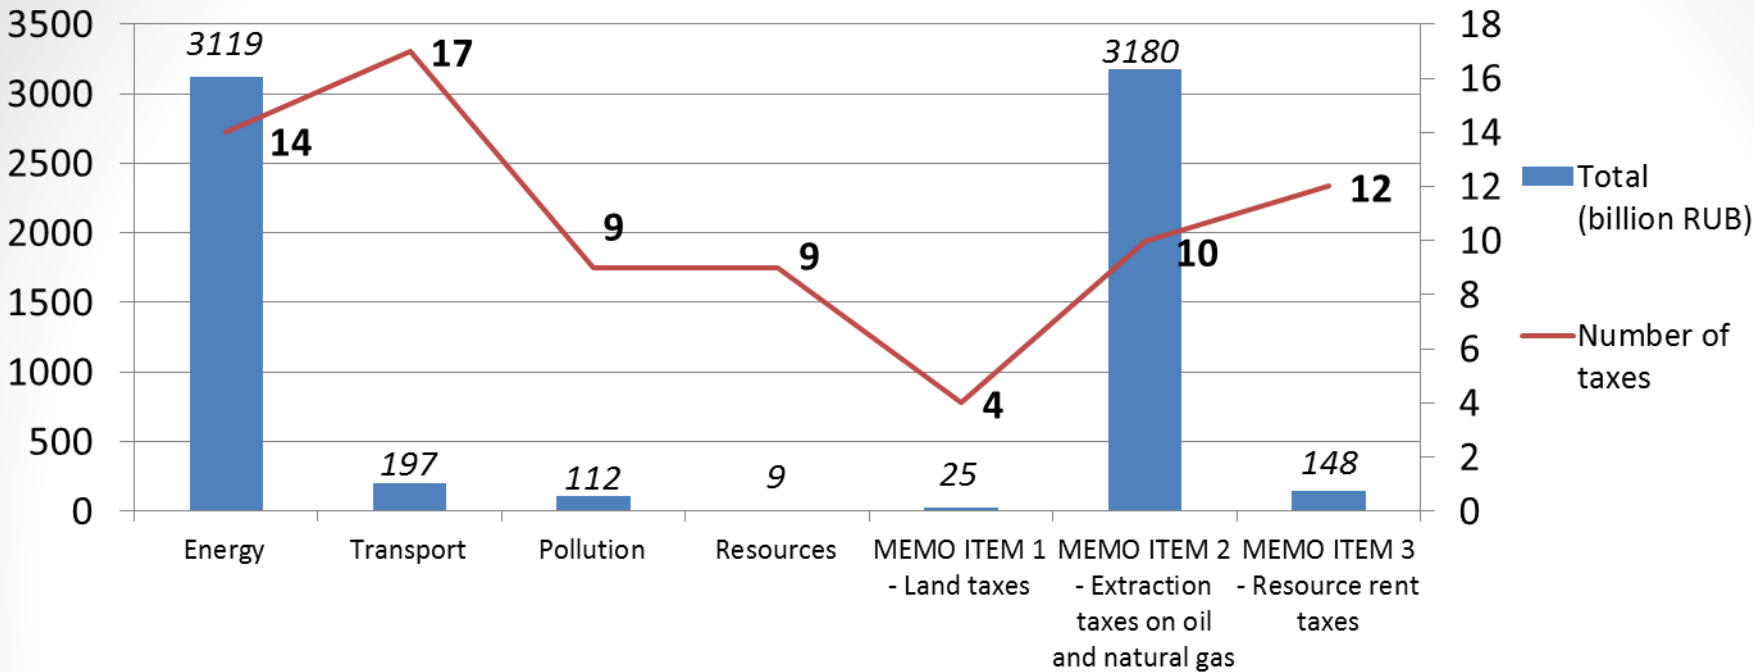

- A statistical guide: Environmental taxes (2013)  
(was translated into Russian by Rosstat specialists)

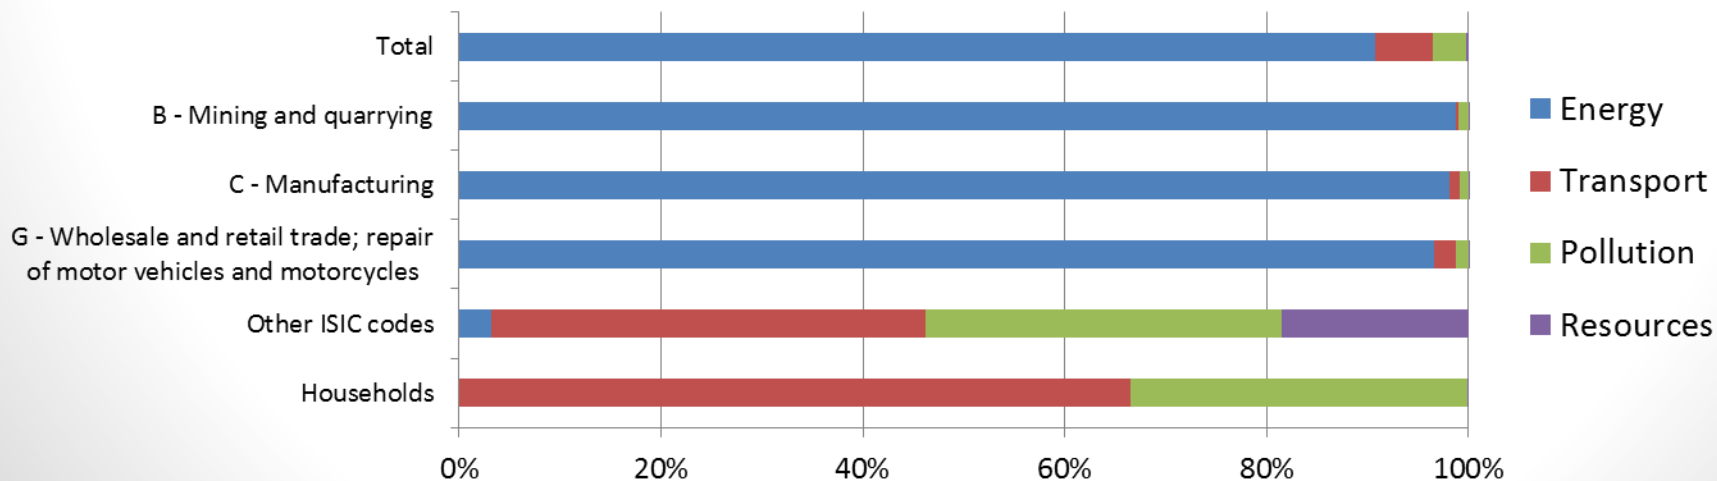

- Expert recommendations and comments from Statistics Estonia and OECD Departments

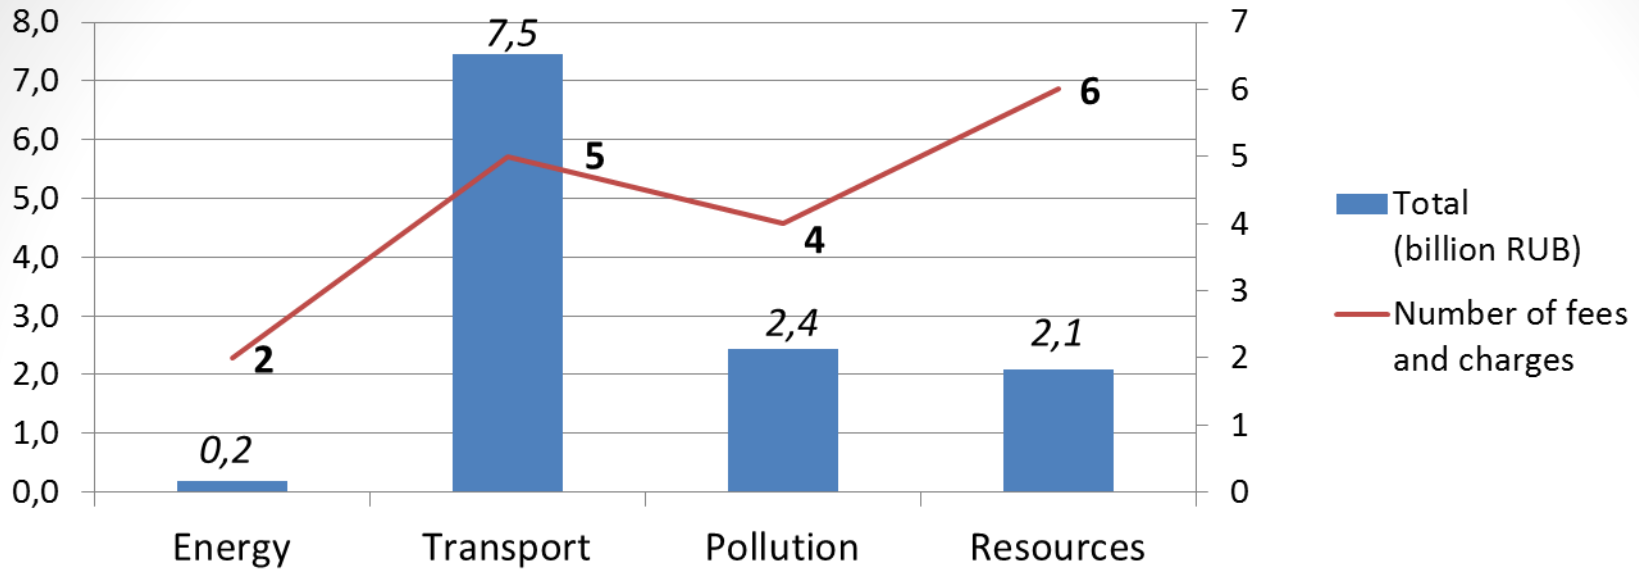

# Accrual of environmental taxes in the Russian Federation in 2015

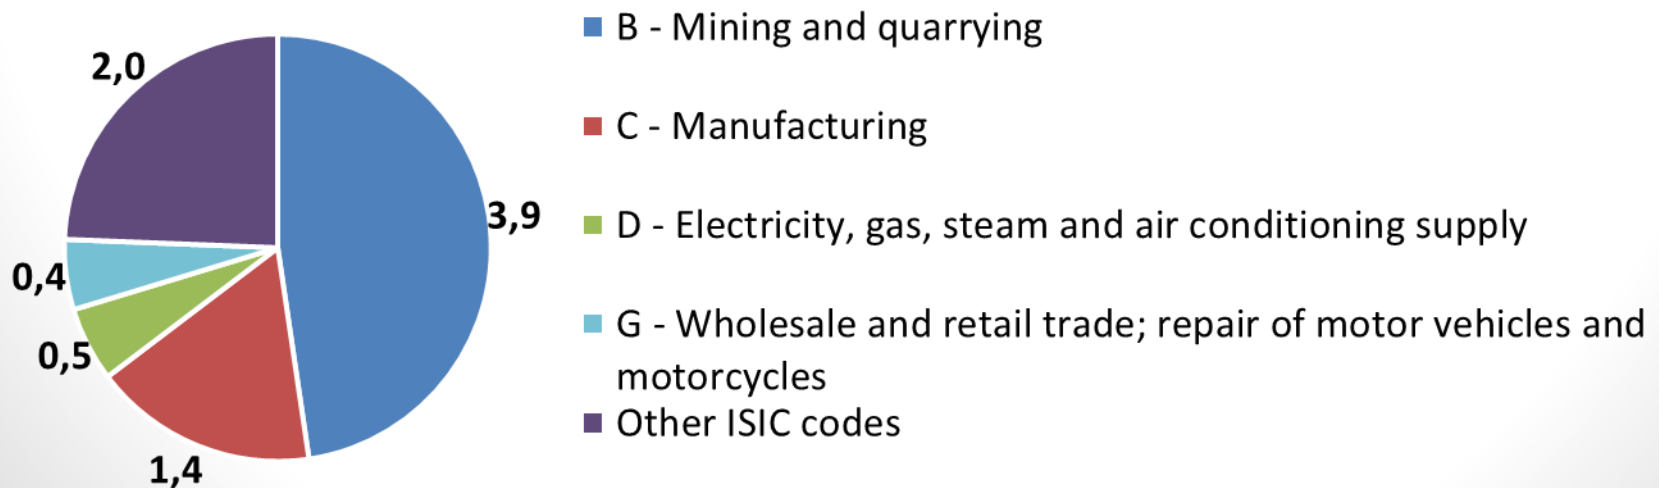

## Distribution of environmental taxes in the Russian Federation in 2015 (as percentage of total)

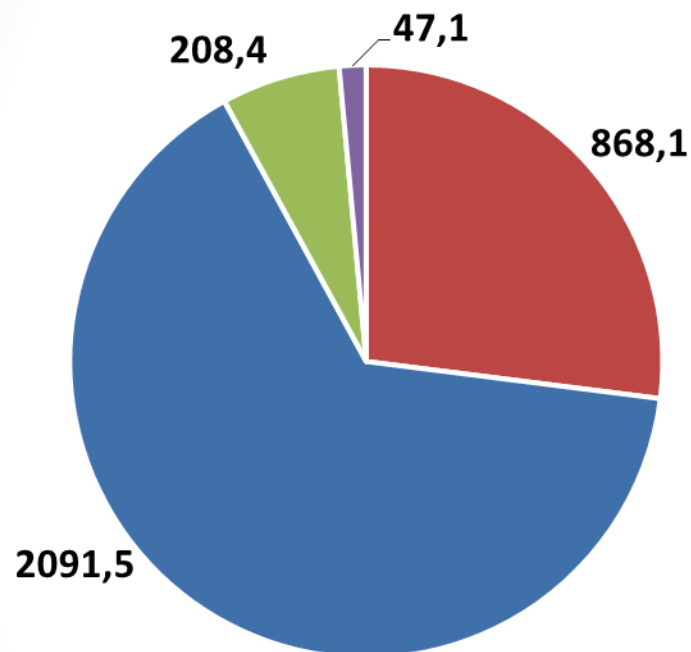

# Accrual of environmental fees and charges in the Russian Federation in 2015

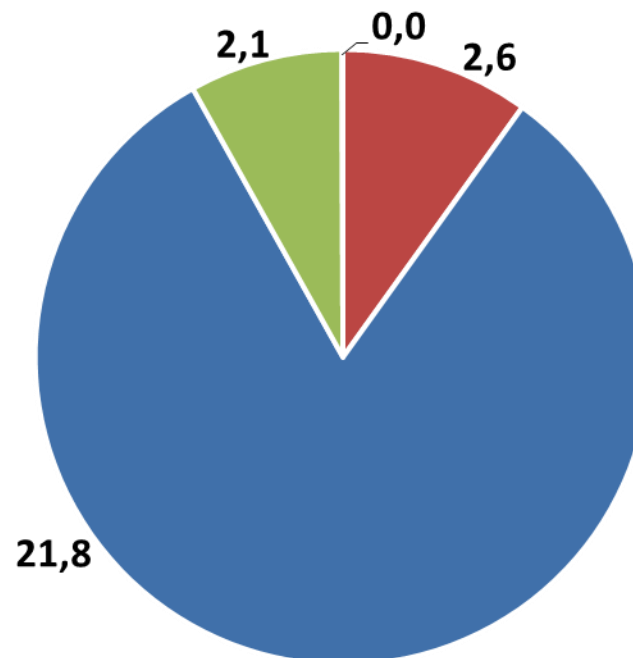

## Distribution of fees and charges across ISIC industries in the Russian Federation in 2015 (billion RUB)

**Distribution of environmental taxes  
across ISIC industries in 2015**  
(billion RUB)

**Distribution of environmental tax  
abatements across ISIC industries in 2015**  
(billion RUB)

- B - Mining and quarrying
- C - Manufacturing
- G - Wholesale and retail trade; repair of motor vehicles and motorcycles
- Other ISIC codes

# Perspectives

- Revision and approval of the proposed OECD methodological guidelines for compiling ERTR accounts in line with the SEEA according to the received comments and results of testing in “pilot countries”
- Discussions with other Federal executive bodies of Russia about the methods of disaggregation environmental taxes statistics for increasing the accuracy of data
- Development and approval of official statistical methodology for compiling the official statistics of environmentally related tax revenue accounts in Russia considering the OECD methodological guidelines for compiling ERTR accounts in line with the SEEA
- Time series data statistics of environmentally related tax revenue accounts in Russia
