## TF on CCRI : Progress report

Olivier THUNUS

04/10/2019

# Introduction

—

# Main Tasks – from October 2018 to October 2019

---

Following the updated ToR...

- ▶ Revision of indicators
  - methodological clarifications
  - examples of contextual and operational indicators
  - new proposals on adaptation
  - harmonization of metadata sheets
  
- ▶ Draft implementation guidelines
  
- ▶ Final report

# Revision of tier I and II indicators

—

# Revision of indicators

---

Tasks carried out before face-to-face meeting (Sept 2<sup>nd</sup>, 2019)

- Propose operational indicators for each key indicators
- Broaden the perimeter for “additional indicators” to contextual, proxy and other core related indicators
- Update links and tier level for SDG related indicators
- Avoid the reference to “duality” of indicator
- Create a structure for “data source”: main source / explanation / SEEA accounts reference
- Organise meetings with experts on health and adaptation indicators
- Prepare background documents on adaptation indicators, health indicators, text harmonization

# Revision of indicators

---

## Decisions taken during face-to-face meeting

- Replace “Proportion of population living in dwellings with air conditioners or air conditioning” by “Green urban space”
- Turn “Emission intensity of agricultural products” into a contextual indicators
- Go back from “Emission from land (afolu)” to “Emission from land use change (lulucf)”
- Change “Sustainable forest management” into “Percentage of protected areas (based on IUCN criteria)”
- Revise level of “Heat related mortality” in tier 3 and rename “Excess mortality related to heat”
- Revise level of “Distribution of cases of vector-borne diseases” in tier 2 and replace the word “diseases” by “incidence”
- Harmonization of energy terminology

# Strategy for tier III indicators

---

Under the supervision of Steering group:

- Follow the international discussions on our tier III indicators
- If improvement, adapt the metadata sheets

## Still open issues for coming months

---

- Finalise consistency check of contextual and operational indicators
- Complete the references on « Policy context »

# Open question

---

1/

Are you in favor to replace “Proportion of population living in dwellings with air conditioners” by a new indicator on “Green urban space”?

Draft implementation guide

—

# Purposes

---

An implementation guide as

- ▶ a roadmap to implement CCRI
- ▶ a production plan on how to do it
- ▶ an exchange of good practices based on country examples
- ▶ a list of trick and tips for implementers
- ▶ frequently asked questions for users

# Structure

---

## 1/ Introduction

## 2/ Process of implementing a national indicator set

- a. Initiating the process
- b. Identifying policy needs
- c. Developing a plan with timeline
- d. Forming of a technical working group
- e. Select the indicators for the national set
- f. Plan the production with available data
- g. Implement the plan
- h. Plan next steps for indicator for which data are not available

## 3/ Using the indicator set

# Open questions

---

1/

Do you agree with the proposed structure ? Does it meet your expectations ? What is missing ?

2/

Do you wish to contribute to the implementation guide ?  
by reviewing the draft or by giving examples ?

*We are interested for country examples on:*

- ▶ How did you initiate the process ?
- ▶ What was your implementation timeline ?
- ▶ Could you share your production plan ?
- ▶ How do you use indicators to answer policy questions ?
- ▶ Which information would support users of the indicator set ?

*Please express your  
interest, by email,  
before 15 October*

Next steps

—

# Timetable

Nov-Dec 2017	Draft a <b>work plan</b> with activities, timing and division of work	✓
Jan-Mar 2018	<b>Analyse the results</b> of the pilot testing (data sources, needs for further guidance, needs for refinements of the set of indicators)	✓
Apr-Sep 2018	Refine the set of core indicators, taking into consideration the results of the pilot testing and comments received from the electronic consultation: <b>Revise and complete metadata sheets</b> of tier I and tier II indicators, review tier III indicators and identify methodologies, <b>revise the organisation of the indicators</b> according to areas and sub-areas	✓
Oct-Dec 2018	Present interim results to the Expert Forum on Climate Change-related Statistics, and implement recommendations	✓
Jan-Apr 2019	Develop a set of operational and contextual indicators	✓
Apr–Sept 2019	Develop draft implementation guidelines and final report	✓
Oct 2019	Present draft implementation guidelines to Expert Forum on Climate Change-related Statistics	<i>On going</i>
Oct- Nov 2019	Finalise the refining of indicators set and the draft of implementation guide	
Dec 2019	Submit implementation guide to SG and volunteer countries	
Jan 2019	Finalise the implementation guide and final report	
Feb 2020	Submit the report to the CES Bureau
