

Modernizing statistics: The HLG-BAS expert workshop

Gosse van der Veen,
Statistics Netherlands

High Level Group Vision:

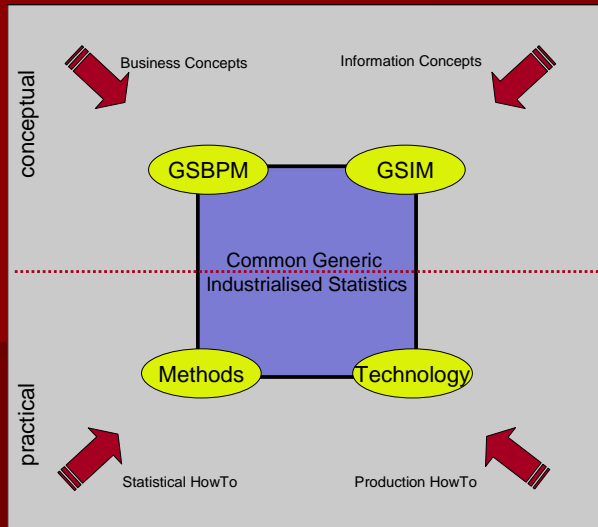

We have to re-invent our products and processes and adapt to a changed world

Vision in brief

- Innovate the products and services
 - Address the global dimension
 - Use the potential of the data explosion
 - Take position in the information value chain
 - Adapt our products to a changing society

Vision in brief

- Industrialize the processes
 - Free up resources, reduce diversity
 - Standardize, save money
 - Minimize labor, ease the burden
 - Collaborate, combine forces

SINCE JUNE 2011:

Since Then:

- Workshops with expert group leaders
 - Nov 2011; we need GSIM
- New Members joined HLG-BAS
 - Mexico, Republic of Korea
- GSIM Sprints (Slovenia, Korea, Netherlands)
 - Version 0.8 created in virtual project

GSIM sprint

THEN, JUNE 2012
STRATEGY ENDORSED

Strategy: HOW

- Improve processes to free up resources
- Make products and services easier to produce
- Use the potential of the **data explosion**
- Prepare for organizational changes as consequence of these goals

Strategy: Governance

- CES initiated, but is reaching out
- HLG-BAS oversees execution of the strategy
 - Directly in the CES-subordinate groups
 - By (written) consent in the other groups
- Yearly list of key priorities assigned to appropriate expert groups
 - Annual workshop with all relevant groups

Strategy: Next Steps

- Completing the GSIM
- This Workshop.
 - Create our top priorities, sprint candidates
 - Ask you to volunteer for important tasks

THEN, OCTOBER 2012 ST PETERSBURG

High Level Seminar

- Three intensive days of discussions
- 5 continents, 31 countries
- Agreement and resolve

What we have seen:

- NO DOMAIN is **specific!**
 - Think about it!

- BIG data challenge
 - Understanding BIG data
 - For BIG data we need new:
methods, tools, ideas...

What we have seen:

- Common models like GSBPM are already providing a common conceptual platform
- Preconditions for success:
 - Commitment to standards
 - Collaboration

What we have seen:

- Integration of statistics, not just economic
 - Standards are needed in the product area
 - We give conflicting figures, without explanations
 - National agency is part of GLOBAL community
 - Registers are an integration tool!
- This is not about, nor without IT, modernizing is **Strategic**

Thank You

And lets make this a successful
workshop
