Opening Remarks
Modernstat Workshop
11-13 April
Geneva

Marina Signore
Supporting Standards Group- Chair
The Modernstat Workshop

Under the auspice of the High-Level Group for the Modernisation of Official Statistics (HLG-MOS)

The workshop aims to:

• Promote the use of ModernStats models;
• Increase the understanding of the interrelationships between the ModernStats models;
• Facilitate the sharing of experiences, ideas and plans for modernising statistical production by implementing these models;
• Identify opportunities for international collaboration activities.
The goal of the group is to provide implementation support for CSPA and promote sharing of methods, models and tools.

Sharing tools

The goal of the group is to find ways how to develop, enhance, integrate, promote, support and facilitate implementation of the range of standards needed for statistical modernisation.
Sharing Tools Group: Activities in 2018

- CSPA Revision
- Architecture Patterns
- Catalogue of ‘shareable’ things
- Methodology Architecture
Supporting Standards Group: Activities in 2018

- GSIM Revision
- GSBPM Revision
- Integrated view
A wide range of models (GAMSO, GSBPM, GSIM, CSPA, MMM and Roadmap) are available.

More difficult for countries to understand and implement each and all of them.

The level of knowledge and implementation of the models varies in different countries and in the same organisation across different sectors.

Countries ask for guidance in implementing the models (where to start from, what comes first,...)
The Workshop is an important step!!!

– Presentations and discussion of countries experiences

– Presentation and discussion of the survey results on how countries are implementing the Modernstat models and the challenges they are facing

– Foot voting and interactive sessions
The Workshop is an important step!!!

It is important to understand:

– what are the main difficulties faced by countries

– what would be useful in order to better understand the relationships and the interdependencies among the models

– what type of support is needed by countries to better and more effectively implement the models
The Workshop is an important step!!!

It is important to think about:

– What future work is needed?
– How do the models fit with the new HLG-MOS Vision?
