
GSBPM/GAMSO Reviews

InKyung Choi (UNECE)

ModernStats World Workshop 2019
26 June 2019, Geneva, Switzerland

Why review?

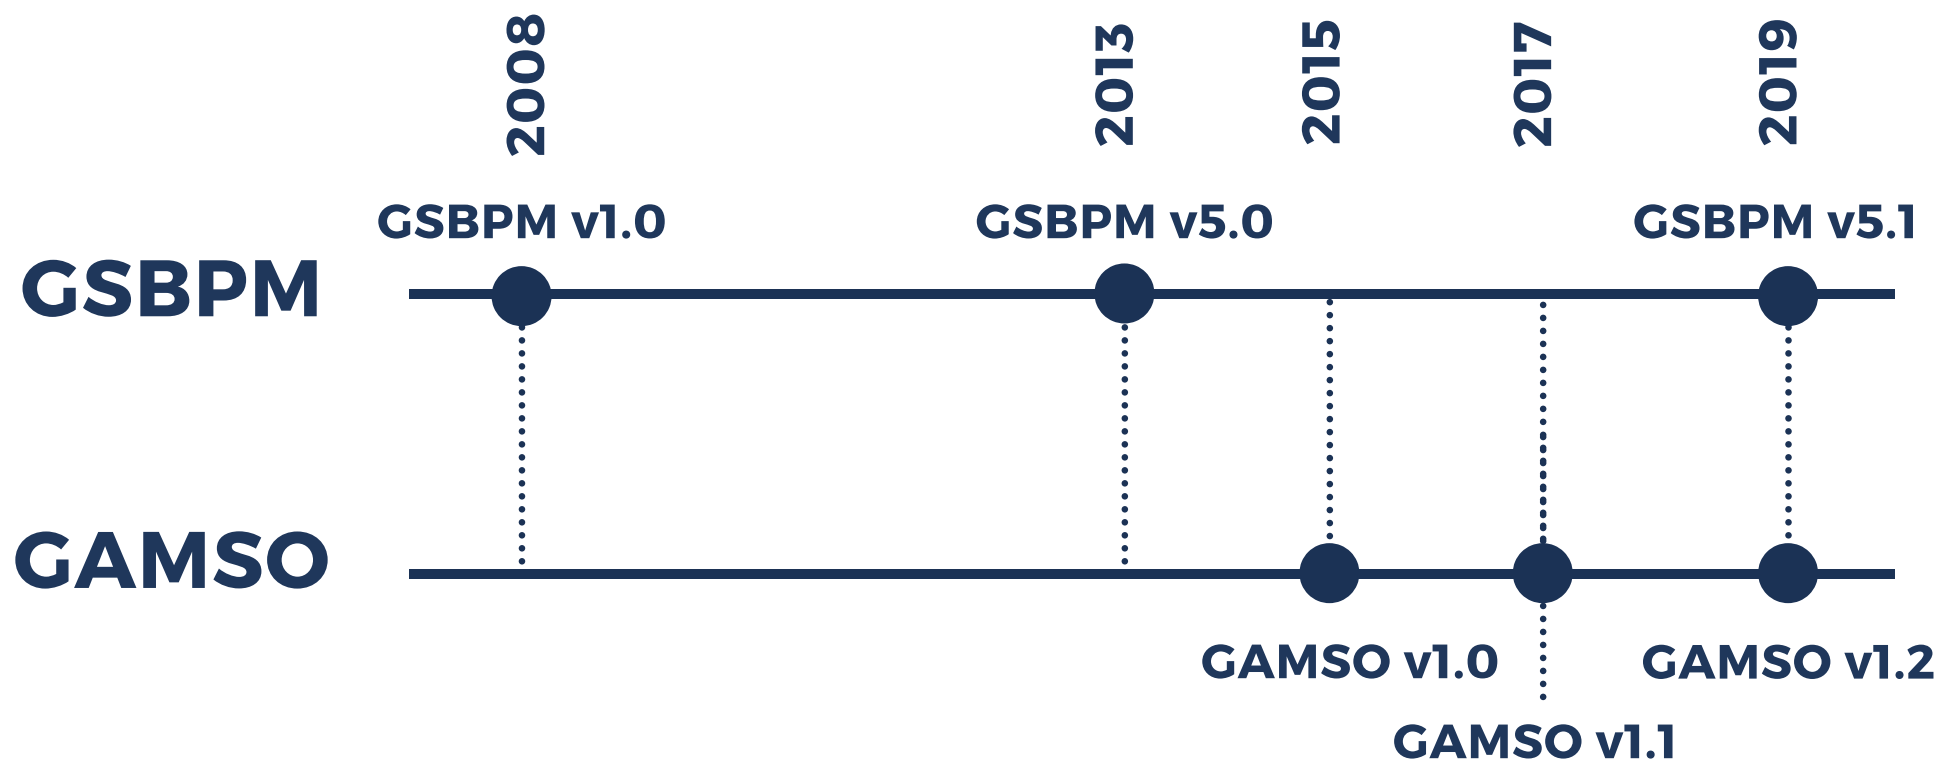

Experiences from users in
using the models in their
organizations

New developments,
e.g. business landscape
where statistical
organizations operate

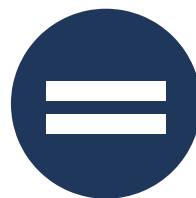

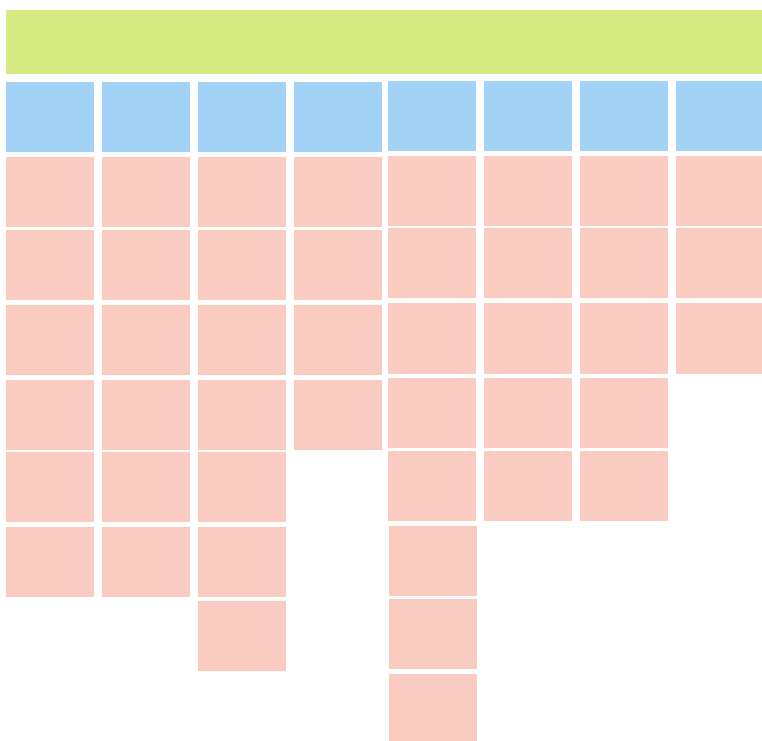

GSBPM/GAMSO Timeline

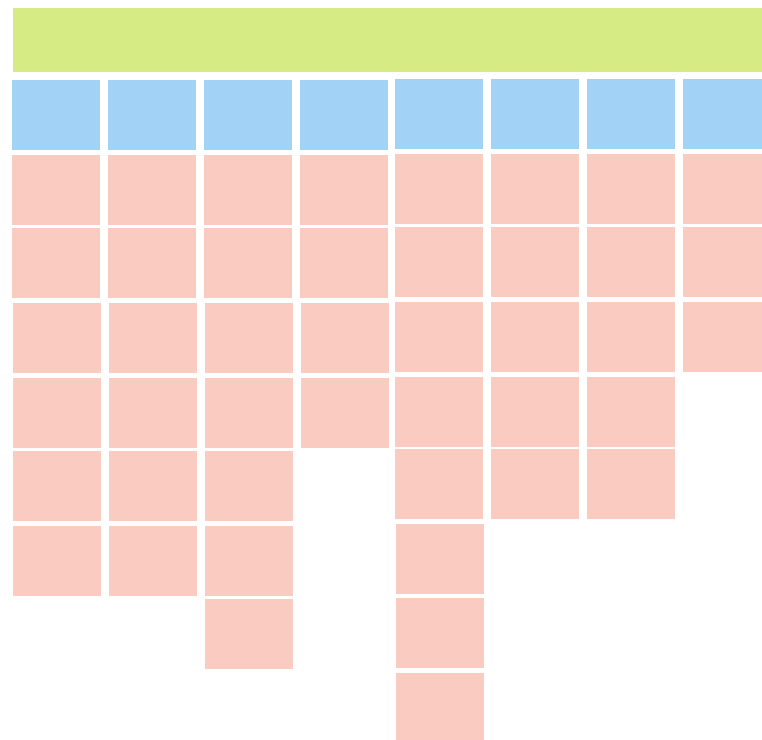

GSBPM main (*non*) change

- No structural change

GSBPM v5.0

GSBPM v5.1

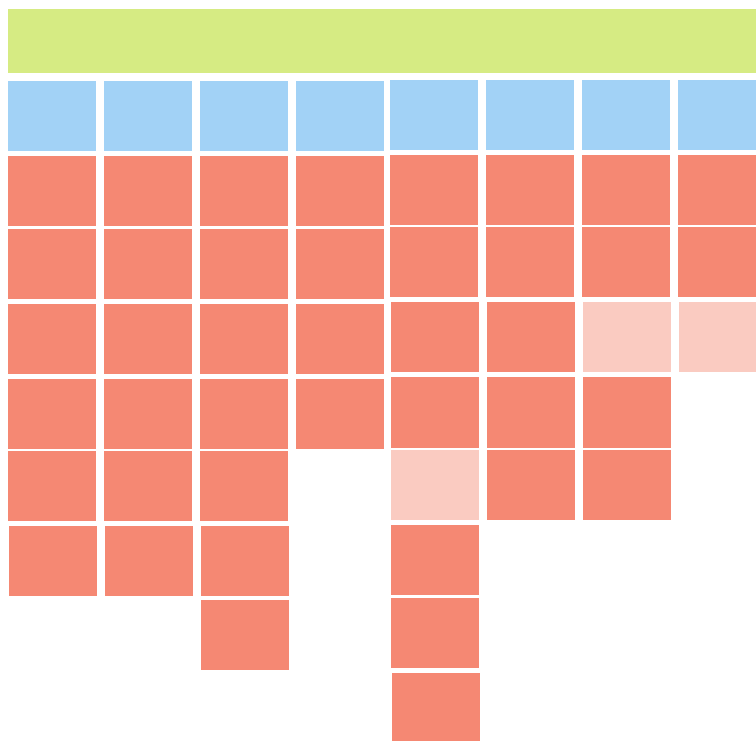

GSBPM main changes

- Few sub-processes are re-named, e.g.

	GSBPM v5.0	GSBPM v5.1
Sub-process 1.6	Prepare Business Case	Prepare and submit business case
Sub-process 3.1	Build collection instruments	Reuse or build collection instruments

GSBPM main changes

- Descriptions have been updated and expanded to make GSBPM more applicable

GSBPM main changes

- Descriptions have been expanded for **non-survey data**, e.g.
 - Compare concepts (1.5 Check data availability)
 - Design mechanism for quality monitoring for third party provider (2.3 Design collection)
 - Consider specification for data integration from multiple sources (2.5 Design processing and analysis)
 - Use administrative data for sampling design (4.1. Create frame and select sample)

GSBPM main changes

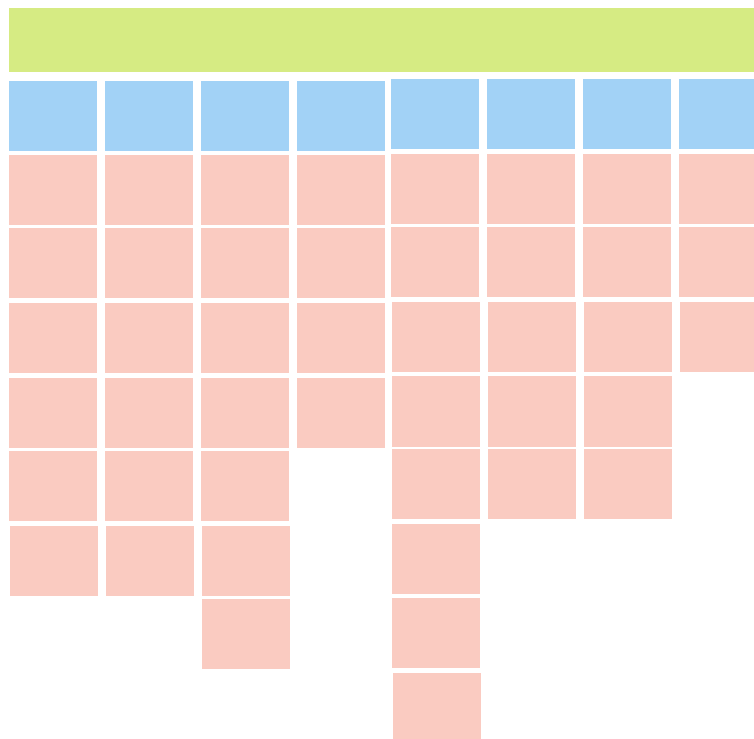

- Descriptions have been expanded for **non-survey data**, e.g.
 - Collect geospatial information while data collection (4.2 Run collection)
 - Check geospatial consistency (6.2 Validate outputs)

GSBPM main changes

- Clarification improved (e.g. 3.6 Configure workflow and 3.7 Test production system)
- Non-linearity of GSBPM emphasized
- Duplication with GAMS0 resolved

GSBPM main changes

- GSBPM has overarching processes (OPs) that apply throughout the eight phases

GSBPM main changes

GSBPM v5.0 Overarching Processes

- Quality management
- Metadata management
- Data management
- Process data management
- Knowledge management
- Provider management
- Statistical framework management
- Statistical programme management
- Customer management
- HR management
- Financial management
- Project management
- Legal framework management
- Organizational framework management
- Strategic planning

GSBPM main changes

- OPs that are conducted at corporate and strategic covered by GAMS0 were removed
- OPs that are close to production remained

GSBPM v5.1 Overarching Processes

- Quality management
- Metadata management
- Data management
- Process data management
- Knowledge management
- Provider management

GSBPM main changes

Quality management

**Corporate
level**

GAMSO scope

- Establishing institutional quality framework
- Developing guidelines for the quality framework

**Process
level**

GSBPM scope

- Monitoring quality throughout process cycle
- documenting lessons learned

GAMSO changes

- Reviewed earlier than cycle due to its close link to GSBPM
- No structural change

- Mostly minor updates on the explanation related to GSBPM and OPs

Contribute to improve the models!

Next review will start in 2022/23
