

# Outcomes of ModernStats World Workshop

Workshop on the Modernisation of Official Statistics  
19-20 November 2019, Geneva

# Goals:

- Promoting the new developments of the ModernStats models and related works;
- Increasing the understanding of the models and interrelationships between them;
- Facilitating the sharing of experiences, ideas and plans for modernising statistical production by implementing the models;
- Identifying opportunities for international collaboration activities.

# Programme

- Dates:
  - June 26th to 28th, 2019
- Sessions:
  - Introduction to the ModernStats Models and Standards: GAMSO, GSBPM, GSIM, CSPA
  - New Developments
  - Implementation of the Models
  - Ideas and Projects Market Place

# Further Work

- Support the implementation of the models
- Improve harmonization within the models as well as with other new models and international statistical standards.
- Communicate the benefits of the models and their status better.
- Improve Generic Statistical Information Model (GSIM) further and promote the model: introduce short (soft) review cycle.
- Collect examples from countries that are using lower-level Generic Statistical Business Process Model (GSBPM) activities to identify common elements.
- Structure the GSBPM overarching processes better and represent content of each in a more standard way to help operationalization.
- Make Common Statistical Production Architecture (CSPA) Catalogue more user-friendly.
- Ensure the use of the Modernization Maturity Mode.
