

# Virtual UNECE Workshop on Statistical Data Editing

31 August – 4 September 2020

## **Methods, Part B: ML methods for E&I**

*Discussants:* Daniel Kilchmann (SFSO),  
Darren Gray (Statistics Canada)

# Overview

4 presentations showing the use of ML in E&I and the corresponding UNECE HLG-MOS project.

1. The UNECE High-Level-Group for the Modernization of Official Statistics Machine Learning Project: A report of the Editing & Imputation Group (DESTATIS)
2. Editing of Social Survey Data (ONS)
3. ML to identify patterns behind errors in STS statistics (ISTAT)
4. Two phase learning (Statistics Norway)

# Procedure

- Ask questions in the chat (@presenter: question).
- Q&A: Clarifying questions (concerning only understanding): 10' after 2 presentations.
- General discussion – more general questions: 20' at the end of the session.

*Enjoy the presentations!*
