What we are talking about

Table 1: Registration / estimation of uses and sources of woody resources by original units

Country

							USERS											
SOURCES		unit in Mio.	domest. product. *)	import export		domest. availa- bility	primary wood processors				energy uses							
							sawmill Industry	panels	pulp	other	Transformed into energy			transformed into bio fuel	house- holds			
											>1MW	<1MW	Total					
	1. Industrial Roundwood	m³ [scu]	49,28	12,96	0,53	61,7	25,86	3,41	36,27	0,33								
	2. Fuelwood <u>excluding</u> charcoal !	m³ [scu]	4,52	0,15	0,01	4,7									4,52			
	3. Logging residues	m³ [scu]	2,31			2,3					2,19	0,12	2,31					
	4. Short rotation forests (SRF/SRC)	m³ [scu]				0,0												
	5. Primary industrial residues	m³ [scu]	16,18	2,11	0,35	17,9					1,07	10,95		3,09	0,08	3,17		0,98
	5.1. Pellets	m³ [bv]	0,33	0,27		0,1					0,06		0,03	0,08			Not av.	
	5.2. Bark	m³ [bv]	23,95			24,0					23,95		0,00	23,95				
5.3. Other industrial residues	m³ [scu]				0,0													
6. Post consumer recovered wood	t air dry	0,35			0,3					0,35		0,00	0,35					
7. Management of urban and amenity trees	t abs. dry	Not available			#WERT!													
The sum can not be balanced, as the reuse of wood is not determined (doublemention)							25,9	4,5	47,2	0,3	29,6	0,2	29,9	0,0	5,4			

*) if data for storage are available, they are directly added or subst

	= these fields might be modified/filled in only!
	= other source of information, please highlight
	= FAO/UNECE Joint forestry section questionnaire (JFSQ 2004)

m³ [scu]	= solid cubic metre, underbark
m³ [bv]	= [bulk volume]

The Analysis of the status quo

- 
- The collaboration between the members of the working party and national energy statisticians has to be established because:
 - The best contacts are the energy statisticians responsible for the Joint IEA/EUROSTAT/UNECE Renewables and Wastes Questionnaire
 - The questionnaire should be harmonized as far as possible with the renewables and waste questionnaire (sectoral breakdown, process definitions) mainly for 2 reasons
 - To reduce the response burden
 - To obtain time series back as far as possible (e. g.
 - Other initiatives like e. g. the EU ThERRA project shall be contacted and collaboration should intended.

Thank you for your

attention
