2. Green economy dialogues

(a) Market Discussions

Documentation: ECE/TIM/2013/3; FO: EFC/2013/3

The market discussions will look at the market situation of wood and non-wood forest products in the region. In particular, they will focus on the sector's progress towards a green economy and more sustainable production and consumption patterns. This will include examples of: efforts to make production processes more environmentally sound; sustainable forest products; and green building. As part of the transition towards a green economy, the issue of wood energy and payments for ecosystem services will be discussed.

Discussions will be supported by data and information collected and publications issued by the ECE-FAO Forestry and Timber Section, such as the Forest Products Annual Market Review 2012-13¹, the results of the Joint Wood Energy Enquiry 2011², the joint ECE-FAO-UNEP publication on payments for ecosystem services and other relevant documents.

(b) Engaging the Private Sector (in conjunction with Item 7d)

Metsä2013 offers a unique opportunity to gather all forest stakeholders in the same place and discuss issues of common interest. In particular, the event will offer an opportunity for Governments and the private sector to meet and exchange experiences and opinions on priorities and challenges for the sector.

To this end, a panel will be dedicated to hearing from the private sector, learning about their current concerns and the impact of the crisis on the forest sector, but also success stories in the transition towards a green economy and the role of innovation in strengthening the economic impact of the sector. This panel will also discuss how the private sector can engage in the implementation of the draft Action Plan for the Forest Sector in a Green Economy and how the work of the Committee and the Commission could support the sector and will develop recommendations on these two points.
