

20 May 2015

UNECE draft brochure on persimmons

Alternative photos as requested by GE.1 at their 63rd session

NOTE: Photo numbers and interpretative text refer to the Powerpoint presentation available prior to the meeting of April. The photo numbers/captions do not reflect changes made at the meeting.

UNECE draft brochure on persimmons

**Alternative photos as requested by
GE.1 at their 63rd session,
21 to 24 April 2015**

Original: Left line a little bit longer

Photo 42
Class I “slight skin defects”
Fine corky lines measuring in total the
distance between the pistil end and the calyx
Limit allowed

Alternativ photo 1

Photo 42
Catégorie I « légers défauts de l'épiderme »
Des lignes fines et cicatrisées mesurant au
total la distance entre l'apex et le calice
Limite admise

Original: Left line a little bit longer

Photo 42
Class I “slight skin defects”
Fine corky lines measuring in total the
distance between the pistil end and the calyx
Limit allowed

Alternativ photo 2

Photo 42
Catégorie I « légers défauts de l'épiderme »
Des lignes fines et cicatrisées mesurant au
total la distance entre l'apex et le calice
Limite admise

**Alternativ photo,
shorter “line” = more 1/16 of the surface**

Photo 44
Class I “slight skin defects”
Rubbing affecting in total 1/16 of the
surface of the fruit
Limit allowed

Photo 44
Catégorie I « légers défauts de l'épiderme »
Légers défauts de l'épiderme du aux frottements
affectant 1/16 de la surface totale du fruit
Limite admise

**delete the black spot,
enlarge the brownish area**

Photo 45a
Class I “slight skin defects”
Rubbing affecting in total 1/16 of the
surface of the fruit
Limit allowed

Alternativ photo

Photo 45a
Catégorie I « légers défauts de l'épiderme »
Légers défauts de l'épiderme du aux frottements
affectant 1/16 de la surface totale du fruit
Limite admise

**delete cracks and make black
area somewhat lighter in colour**

Photo 45b
Class I “slight skin defects”
Rubbing affecting in total 1/16 of the
surface of the fruit
Limit allowed

We did carefully check this photo. Even if the cracks would disappear by means of Photoshop the defect would look more Class II than Class I.
The skin defect on the alternative photo is too large for Class I, eventually the UNECE publication department can help to shrink the area to make it 1/16 of the surface of the fruit.

Légers défauts de l'épiderme du aux frottements
affectant 1/16 de la surface totale du fruit
Limite admise

a lighter calyx?

Our skills in Photoshop are not sufficient to manipulate this photo. But is it really necessary to brighten up the calyx? Minimum requirements do allow a „brown and dry calyx“.

Photo 49
Class I “a slight damage to the calyx”
Halve of outer parts of the calyx
missing – Limit allowed

Photo 49
Catégorie I « Un léger dommage causé au calice »
La moitié des feuilles du calice absente
Limite admise

**Alternativ photo no. 1,
less internal discolouration = closer to 1/3**

Photo 50
Class I “slight internal discolouration”
Slight internal discolouration affecting
1/3 of the cross-section
Limit allowed

Photo 50
Catégorie I « Une légère brunissement interne de
la chair»
Une légère brunissement interne affectant 1/3 de
la section transversale
Limite admise

**Alternativ photo no. 2,
less internal discolouration = closer to 1/3**

Photo 50
Class I “slight internal discolouration”
Slight internal discolouration affecting
1/3 of the cross-section
Limit allowed
