**Sixty-fourth session**

Geneva, 18 -21 April 2016

Item 3(i) of the provisional agenda

**Revision of UNECE standards**

**Revision of UNECE standards – Citrus fruit - Non-Exhaustive List of Citrus Varieties**

**Proposal by the delegation of South Africa**

## **Annex**

### **Non-Exhaustive List of Citrus Varieties**

Some of the varietal names listed in the following table may indicate varieties for which patent protection has been obtained in one or more countries. Such proprietary varieties may only be produced or traded by those authorized by the patent holder to do so under an appropriate licence. The United Nations takes no position as to the validity of any such patent or the rights of any such patent-holder or its licensee regarding the production or trading of any such variety.

Some of the varieties listed in the following table may be marketed under names for which trademark protection has been sought or obtained in one or more countries. Names believed by the United Nations to be varietal names are listed in the fourth column. Other names by which the United Nations believes the variety may be known are listed in the fifth column. None of these columns is intended to include trademarks. The presence of any trademarks in the fourth or fifth columns does not constitute any licence or permission to use that trademark – such licence must come directly from the trademark owner. In addition, the absence of a trademark in the fourth or fifth columns does not constitute any indication that there is no registered/pending trademark for such a variety. For labelling requirements please refer to section VI of the Citrus Standard-FFV14.

The United Nations endeavoured to ensure that no trademark names are listed in the table. However, it is the responsibility of any trademark owner to notify the United Nations promptly if a trademark name has been included in the table and to provide the United Nations (see address below) with an appropriate varietal, or generic name for the variety, as well as adequate evidence ownership of any applicable patent or trademark regarding such variety so that the list can be amended. Provided that no further information is needed from the trademark holder, the Working Party on Agricultural Quality Standards will change the list accordingly at the session following receipt of the information. The United Nations takes no position as to the validity of any such trademarks or the rights of any such trademark owners or their licensees.

Since this is a non-exhaustive list, not all citrus varieties are currently listed. Fruit of citrus varieties that are not part of this list must be graded according to their varietal characteristics. Furthermore, to update the list, please submit your request to the Specialized Section for the Standardization of Fresh Fruit and Vegetables. In addition, provision will be made for new citrus variety groups as and when such groups become commercially available, for example, pigmented mandarins.

**Non-exhaustive list of citrus varieties.**

<b>Species</b>	<b>Common name</b>	<b>Variety group or marketing group</b>	<b>Variety</b>	<b>Synonym</b>
<i>Citrus limon</i>	Lemon(s)		Adamo Eureka Eureka Seedless Femminello Fino Genoa Interdonato Kütdiken Lamas Lisbon Limoneira 8A Verna Villafranca 2PH Eureka Seedless  Meyer (not a true lemon)	Eureka SL™  Primofiori Genova
