

Economic Commission for Europe**Steering Committee on Trade Capacity and Standards****Working Party on Agricultural Quality Standards****Seventy-fifth session**

Geneva, 19-21 November 2019

Item 8 of the provisional agenda

Specialized Section on Standardization of Dry and Dried Produce**Dried Melons****Submitted by the secretariat**

The following document is submitted to the Working Party for adoption as a new UNECE Standard for Dried Melons. The document is prepared according to ECE/CTCS/2017/10 section II c and ECE/CTCS/2018/2 section VII a.

I. Definition of produce

This standard applies to dried melons of varieties (cultivars) grown from *Cucumis melo* L., intended for direct consumption or for food when intended to be mixed with other products for direct consumption without further processing. This standard does not apply to dried melons that are processed by salting, sugaring, flavouring, or roasting or for industrial processing.

Dried melons may be presented in the following styles:

- Longitudinal slices, cut by full length of fruits or its part
- Braid, longitudinal slices braided into rope-like form
- cubes
- Strips of regular or irregular shape
- Any other style of dried melon shall be permitted provided that the product is distinct from the above-mentioned styles and sufficiently labelled.

II. Provisions concerning quality

The purpose of the standard is to define the quality requirements of dried melons at the export-control stage after preparation and packaging.

However, if applied at stages following export, the holder/seller shall be responsible for observing the requirements of the standard. The holder/seller of products not in conformity with this standard may not display such products or offer them for sale or deliver or market them in any other manner.

A. Minimum requirements ¹

In all classes, subject to the special provisions for each class and the tolerances allowed, the dried melons must be:

- sound; produce affected by rotting or deterioration such as to make it unfit for human consumption is excluded
- clean, practically free of any visible foreign matter
- sufficiently developed
- free from living pests whatever their stage of development
- free from damage caused by pests, including the presence of dead insects and/or mites, their debris or excreta
- free from blemishes, areas of discolouration or spread stains in pronounced contrast with the rest of the produce affecting in aggregate more than 20 per cent of the surface of the produce
- free from mould filaments visible to the naked eye
- free of fermentation
- free of abnormal external moisture
- free of foreign smell and/or taste except for a slight salty taste of sodium chloride and/or calcium chloride or a slight sour taste of citric acid and a slight smell of preservatives/additives, including sulphur dioxide.

The condition of the dried melons must be such as to enable them:

- to withstand transportation and handling
- to arrive in satisfactory condition at the place of destination.

B. Moisture content ²

The dried melons shall have a moisture content:

- not exceeding 18.0 per cent for untreated dried melons;
- between 18.0 and 25.0 per cent for dried melons treated with preservatives or preserved by other means (e.g. pasteurization)

C. Classification

In accordance with the defects allowed in section “IV. Provisions concerning tolerances”, dried melons are classified into the following classes:

“Extra” Class, Class I, Class II.

The defects allowed must not affect the general appearance of the produce as regards quality, keeping quality and presentation in the package.

¹ Definitions of terms and defects are listed in Annex III of the Standard Layout – Recommended terms and definition of defects for standards of dry (Inshell Nuts and Nut Kernels) and dried produce <http://www.unece.org/trade/agr/standard/dry/StandardLayout/StandardLayoutDDP_e.pdf>.

² The moisture content is determined by one of the methods given in Annex I of the Standard Layout – Determination of the moisture content for dried produce <http://www.unece.org/trade/agr/standard/dry/StandardLayout/StandardLayoutDDP_e.pdf>. The laboratory reference method shall be used in cases of dispute.

III. Provisions concerning sizing

Sizing of dried melons is optional. However, when sized, size is determined by the diameter of the widest part along the longitudinal axis depending on the form of the produce.

IV. Provisions concerning tolerances

At all marketing stages, tolerances in respect of quality and size shall be allowed in each lot for produce not satisfying the minimum requirements of the class indicated.

A. Quality tolerances

<i>Defects allowed</i>	<i>Tolerances allowed, percentage of defective produce, by number or weight</i>		
	<i>"Extra" Class</i>	<i>Class I</i>	<i>Class II</i>
a) Tolerances for produce not satisfying the minimum requirements	5	10	15
of which no more than:			
Injuries and damage caused during drying	5	10	15
Mouldy and mildew spots	0.5	4.5	9.0
of which no more than mouldy	0	0.5	1.0
Fermentation, rotting, or deterioration	0.5	1.5	3.0
of which not more than:			
- Fermentation	0.5	1.0	2.0
- Rotting	0	0.5	1.0
Damages caused by pests	1	2	4
Living pests	0	0	0
b) Size tolerances (if sized)			
For produce not conforming to the size indicated, in total	10	15	20
Pieces among dried slices of melons (by weight)	2	8	15
c) Tolerances for other defects			
Foreign matter, separated seeds and skin fragments	1	1	1
Not fully ripe pieces among ripe dried melons	0	1	3

V. Provisions concerning presentation

A. Uniformity

The contents of each package must be uniform and contain only dried melons of the same origin, quality, style and size (if indicated) and variety (if indicated) and colouring (if indicated).

The visible part of the contents of the package must be representative of its entire contents.

B. Packaging

The dried melons must be packed in such a way so as to protect the produce properly.

The materials used inside the package must be clean and of a quality such as to avoid causing any external or internal damage to the produce. The use of materials, particularly of paper and stamps bearing trade specifications, is allowed, provided the printing or labelling has been done with non-toxic ink or glue.

Packages must be free of all foreign matter in accordance with the table of tolerances in Section. IV. "Provisions concerning tolerances".

VI. Provisions concerning marking

Each package³ must bear the following particulars in letters grouped on the same side, legibly and indelibly marked and visible from the outside:

A. Identification

Packer and/or dispatcher:

Name and physical address (e.g. street/city/region/postal code and, if different from the country of origin, the country) or a code mark officially recognized by the national authority.⁴

B. Nature of produce

- "Dried melons"
- Style
- Name of the variety (optional)
- "Sun dried" or method of drying (optional).

C. Origin of produce

- Country of origin ⁵ and, optionally, district where grown or national, regional or local place name.

D. Commercial specifications

- Class
- Size (if sized); expressed in accordance with section III
- Crop year (optional)
- "Best before" followed by the date (optional).

E. Official control mark (optional)

³ These marking provisions do not apply to sales packages presented in packages.

⁴ The national legislation of a number of countries requires the explicit declaration of the name and address. However, in cases where a code mark is used, the reference "packer and/or dispatcher" (or equivalent abbreviations) must be indicated in close connection with the code mark, and the code mark should be preceded with the ISO 3166 alpha country code of the recognizing country, if not the country of origin.

⁵ The full or commonly used name should be indicated.
