

Ministry of Telecom and
Mass Communication
of the Russian Federation

- Universal part of the Russian contribution to the various international formats
ESCAP, UNCITRAL, CEFACT, WTO, ITU, EAEU, BSEC, BRICS and other

Basic term “Transboundary trust space [*environment*]” in draft text of the regional arrangement for the facilitation of cross-border paperless trade

Article 3

[(j) bis “Transboundary trust space” **means a combination of legal, organizational and technical conditions** recommended by relevant specialized United Nations agencies (departments) and international organizations with the aim of ensuring trust (confidence in authenticity) in the international exchange of electronic documents and data between electronically interacting parties (subjects);
...]

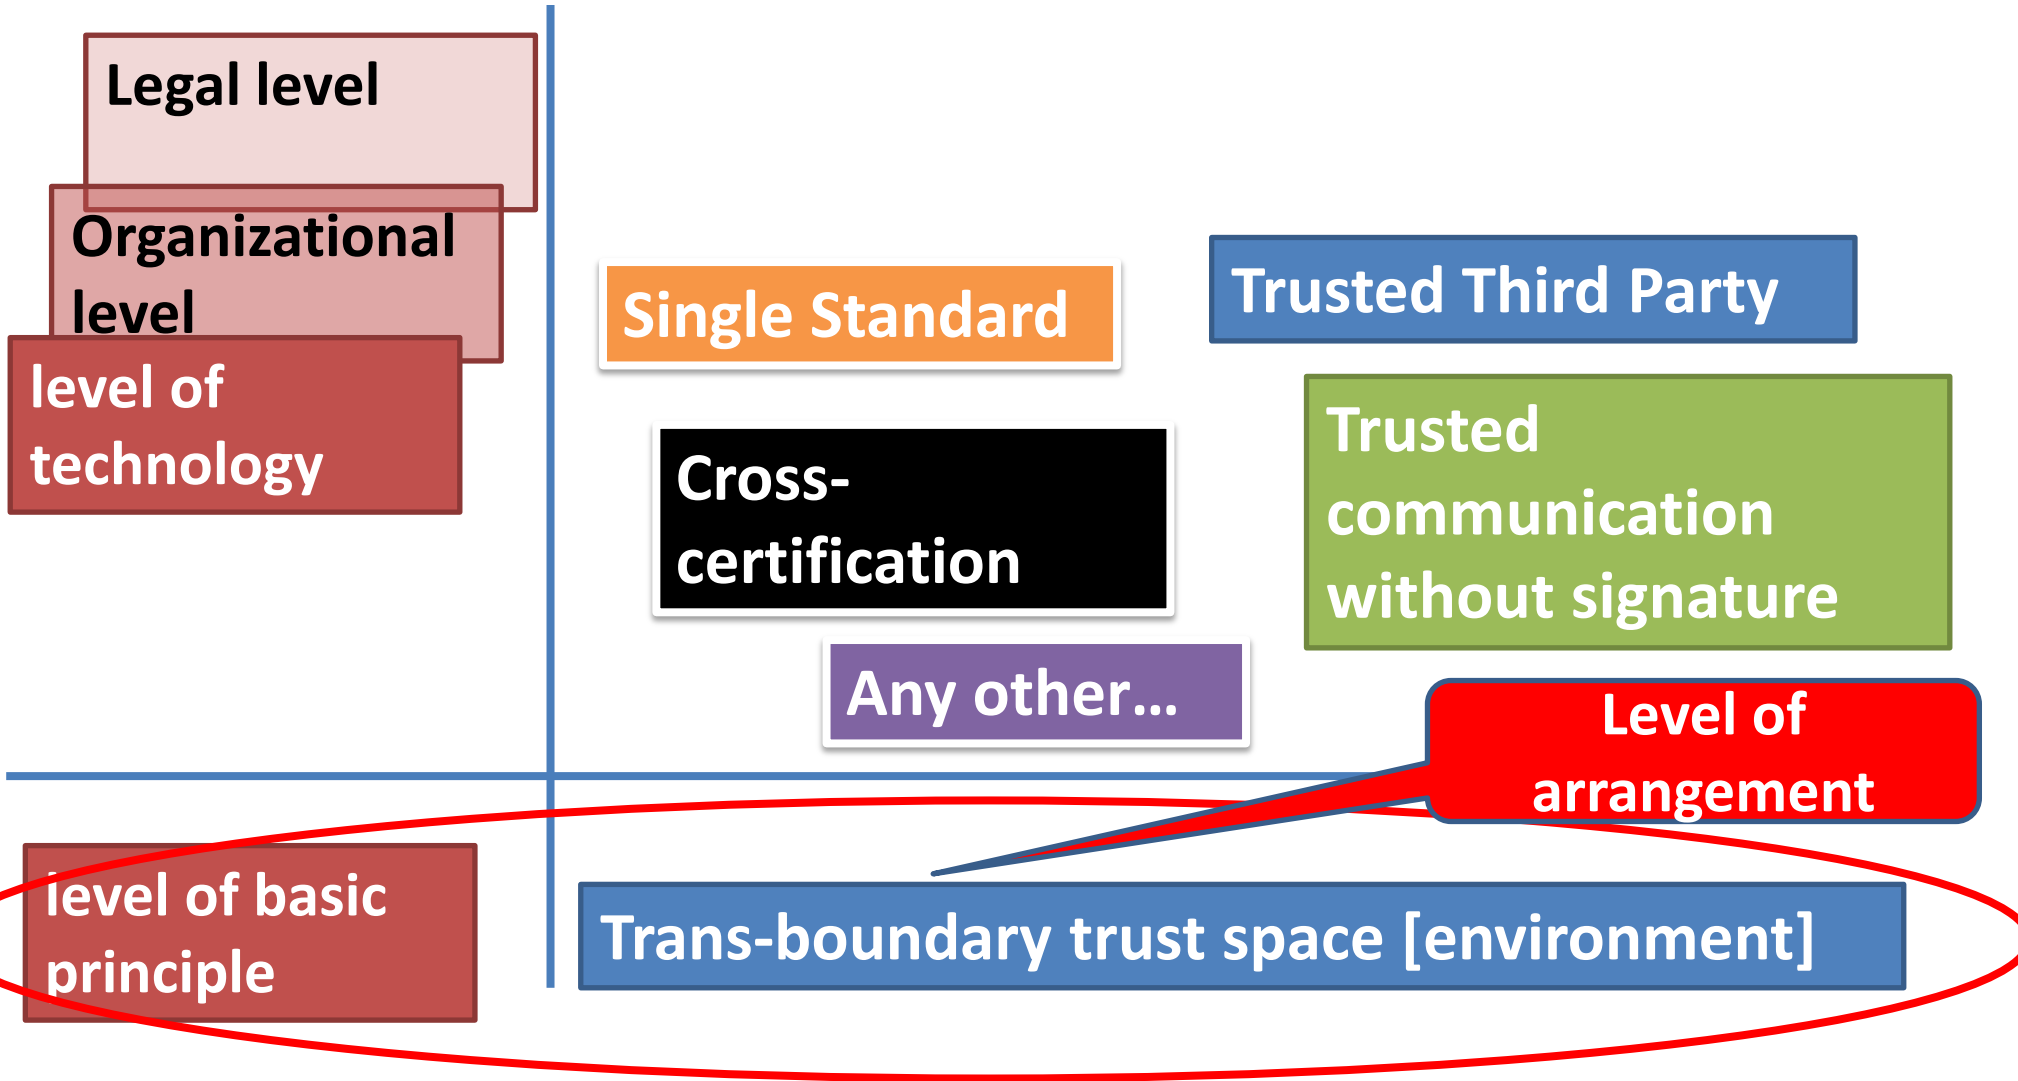

Trans-boundary trust space [environment]

Combination of conditions:

- legal
- organizational
- technical

TTS is not TTP !

Why is this principle needed?

p. 5

Ministry of Telecom and
Mass Communication
of the Russian Federation

For interaction between heterogeneous systems requires the overall system requirements for this interaction.
We will not begin this task without giving legal consolidation of this legal entity at the level of international agreement.

Ministry of Telecom and
Mass Communication
of the Russian Federation
