Methodological instruction according to section 6.2.5 ADR

Dear Sabrina,

we would like to ask you to publish the Methodological instruction according to section 6.2.5 ADR for the design, construction, production and test for cylinders with a volume of less than 0.5 l on the website UNECE. The Methodological instruction is attached.

Thank you

Best regards

Pavol Baran
Director
Department of Road Transport

Ministry of Transport

Ref: 38/2018-110-SDNA/1

Methodological Instruction
of Ministry of Transport of the Czech Republic
Ref.: 41/2016-130-OST (1 July 2016)

Design, construction, production and test for cylinders
with a volume of less than 0.5 l

- *European Agreement concerning the International Carriage of Dangerous Goods by Road (ADR)*

Section 6.2.5

Requirements for non-UN pressure receptacles not designed, constructed and tested according to referenced standards

To reflect scientific and technical progress or where no standard is referenced in 6.2.2 or 6.2.4, or to deal with specific aspects not addressed in a standard referenced in 6.2.2 or 6.2.4, the competent authority may recognize the use of technical code providing the same level of safety.

Measures taken:

The standard EN 13322-1:2003+A1:2006 *Transportable gas cylinders – Refillable welded steel gas cylinders – Design and construction – Part 1: Welded steel* used in RID for cylinders with a capacity from 0.5 l to 150 l can also be used for the design, construction, production and testing of bottles with a volume of less than 0.5 liters.

The competent authority for ADR in the Czech Republic

For the Ministry of Transport
