

Comments on the comments raised (document MCSYM -03-02) on the review of the draft GTR on Symbols, Tell-tales and indicators for motorcycles

Please find attached the comments received from the informal group Members on document MCSYM-03-02, the compilation of comments received on the MCSYM-02-01 Rev 1.

The comments by the informal group Members on the other comments are most helpful in slowly converging the discussions and agreements into developing the next draft of the GTR hopefully as a formal document (deadline of 24 January) to the GRSG meeting. Secretariat plan is to develop a single document which would allow ease of comparison and reading of the comments raised.

The Secretariat has had conference call discussion with US representatives for a better understanding of their comments and the direction of the GTR. The Secretariat is hopeful that the further refined comments and new wording proposals from the US will be available very soon for distribution and discussion.
