Proposal for amendment to Regulation No. 7 (front and rear position(side) lamps stop-lamps and end-outline marker lamp)

Submitted by the expert from Poland*

The text reproduced below was prepared by the expert from Poland. The modifications to the existing text of the UN Regulation are marked in bold for new or strikethrough for deleted characters.

* In accordance with the programme of work of the Inland Transport Committee for 2010–2014 (ECE/TRANS/208, para. 106, ECE/TRANS/2010/8, programme activity 02.4), the World Forum will develop, harmonize and update Regulations in order to enhance the performance of vehicles. The present document is submitted in conformity with that mandate.

I. Proposal

Add new paragraph 5.8 to read:

"5.8. To obtain type approval according this Regulation is required possibility to install lamp in question at least on one type of vehicle according requirements of Regulation No 48.

II. Justification

Because in Regulation No7 there are not requirements regarding change of luminance of lamp it is possible to obtain type approval for lamps which cannot be mounted on vehicle according Regulation 48. But such lamps can be used as aftermarket parts and could be installed on used vehicles. This proposal is intended to protect against such situation.
