

Comments from INDIA on Informal documents GRRF-73-11 and GRRF-73-10

Submitted by the expert from INDIA

A. Proposal from India :

- 1) In document No GRRF 73-11
Para 5.3 (a) appendix 2 of Annex 3, **Install an SRTT (Specification E 1136) in the test position of the vehicle, which may be a trailer.**

- 2) Same change in Para 1.3 (a) of GRRF 73-10

B. Justification:

The alternate procedure should not rule out the use of the equipment prescribed in ASTM 1137, even though the trailer method can have some problem on a low μ friction surface, it may be recorded that USA has been using this method from very long time. In India we have not faced any difficulties so far therefore India proposes the option of using ASTM method, which should not be removed from the scope of the standard.
