

# Triangular Retro Reflector - Need for GRE advice -

# **What is the problem:**

Do we really need a special identification for trailer?

# **What we want from GRE:**

To have in Reg. 48 the triangular shape for reflex reflectors as an option on trailers since there no difference in speed or lenght.

# Does this small trailer constitute a special safety problem in traffic?

**Does this huge vehicle constitute a special safety problem in traffic?**

---

**....or this?**

# Is this huge vehicle comparable to the small trailer before?

# BTW: This is the historical origin of the triangular identification!
